Radon Information

This section lists any relevant radon information found for the target property.

Federal EPA Radon Zone for *ESCAMBIA* County: **3**

Zone 1: Counties with predicted average indoor radon screening levels greater than 4 pCi/L
Zone 2: Counties with predicted average indoor radon screening levels from 2 to 4 pCi/L
Zone 3: Counties with predicted average indoor radon screening levels less than 2 pCi/L

Federal Area Radon Information for *ESCAMBIA* County

No Measures/Homes:	90
Arithmetic Mean:	0.5
Standard Deviation:	0.2
Maximum:	1.5
% >4 pCi/L:	-
% >8 pCi/L:	-
% >12 pCi/L:	-
Notes on Data Table:	TABLE 2. Indoor radon results from the Florida population-based radon survey, by county.

Appendix

Federal Sources

FEMA National Flood Hazard Layer — **FEMA FLOOD**

The National Flood Hazard Layer (NFHL) data incorporates Flood Insurance Rate Map (FIRM) databases published by the Federal Emergency Management Agency (FEMA), and any Letters Of Map Revision (LOMRs) that have been issued against those databases since their publication date. The FIRM Database is the digital, geospatial version of the flood hazard information shown on the published paper FIRMs. The FIRM Database depicts flood risk information and supporting data used to develop the risk data. The FIRM Database is derived from Flood Insurance Studies (FISs), previously published FIRMs, flood hazard analyses performed in support of the FISs and FIRMs, and new mapping data, where available.

Indoor Radon Data — **INDOOR RADON**

Indoor radon measurements tracked by the Environmental Protection Agency(EPA) and the State Residential Radon Survey.

Public Water Systems Violations and Enforcement Data — **PWSV**

This list of drinking water violations and enforcement actions is sourced from the U.S Environmental Protection Agency's (EPA) Enforcement and Compliance History Online (ECHO) system that incorporates Public Water Systems data from EPA's Safe Drinking Water Information System (SDWIS) database, as part of the national download of Safe Drinking Water Act (SDWA) data. SDWIS contains information on public water systems from the Public Water System Supervision (PWSS) Program, including monitoring, enforcement, and violation data related to requirements established by the SWDA. Address information provided in SWDIS may correspond either with the physical location of the water system, or with a contact address.

Radon Zone Level — **RADON ZONE**

Areas showing the level of Radon Zones (level 1, 2 or 3) by county. This data is maintained by the Environmental Protection Agency (EPA).

Safe Drinking Water Information System (SDWIS) — **SDWIS**

This national download of Safe Drinking Water Act (SDWA) data is sourced from the U.S Environmental Protection Agency's (EPA) Enforcement and Compliance History Online (ECHO) system that incorporates Public Water Systems data from EPA's Safe Drinking Water Information System (SDWIS) database. SDWIS contains information on public water systems from the Public Water System Supervision (PWSS) Program related to requirements established by the Safe Drinking Water Act (SDWA). Address information provided in SWDIS may correspond either with the physical location of the water system, or with a contact address.

Soil Survey Geographic database — **SSURGO**

The Soil Survey Geographic database (SSURGO) contains information about soil as collected by the National Cooperative Soil Survey at the Natural Resources Conservation Service (NRCS). Soil maps outline areas called map units. The map units are linked to soil properties in a database. Each map unit may contain one to three major components and some minor components.

U.S. Fish & Wildlife Service Wetland Data — **US WETLAND**

The U.S. Fish & Wildlife Service Wetland layer represents the approximate location and type of wetlands and deepwater habitats in the United States.

USGS Current Topo — **US TOPO**

US Topo topographic maps are produced by the National Geospatial Program of the U.S. Geological Survey (USGS). The project was launched in late 2009, and the term "US Topo" refers specifically to quadrangle topographic maps published in 2009 and later.

USGS Geology — **US GEOLOGY**

Seamless maps depicting geological information provided by the United States Geological Survey (USGS).

USGS National Water Information System — **FED USGS**

The U.S. Geological Survey's (USGS) National Water Information System (NWIS) is the nation's principal repository of water resources data. The data includes comprehensive information of well-construction details, time-series data for gage height, streamflow, groundwater level, and precipitation and water use data. This NWIS database information is obtained through the Water Quality Data Portal (WQP). The WQP

is a cooperative service sponsored by the USGS, the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC).

State Sources

Florida Subsidence Incident Reports — **SINKHOLES**

A list of Florida Subsidence Incidents made available by the Florida Department of Environmental Protection (DEP) and maintained by the Florida Geological Survey. Sinkholes are closed depressions in areas underlain by soluble rock such as limestone, dolostone, and in some states gypsum and salt. Other subterranean events can cause holes, depressions, or subsidence of the land surface that may mimic sinkhole activity. Commonly, a reported depression is not verified by a licensed professional geologist to be a true sinkhole, and the cause of subsidence is not known. Such an event is called a subsidence incident.

Oil and Gas Wells — **OGW**

The Oil and Gas Program is the permitting authority within the Florida Department of Environmental Protection's Mining and Minerals Regulation Program. Companies interested in exploration or production of hydrocarbons in Florida are regulated by the Oil and Gas Program. This data is made available by Florida Department of Environmental Protection's Oil and Gas program.

Public Water Supply Wells — **PWSW**

The Public Water Supply Wells (PWSW) data consist of public water supply facilities and their wells in Florida, excluding Federally owned facilities. This data is made available by Florida Department of Environmental Protection, Water Compliance Assurance Program.

Underground Injection Control Wells — **UIC**

Class I Underground Injection Control (UIC) wells that are currently or were previously active, as well as proposed sites, regulated by the Florida Department of Environmental Protection (FDEP). Class I UIC wells are used to inject nonhazardous waste, hazardous waste (new hazardous waste wells were banned in 1983), or municipal waste below the lowermost underground source of drinking water.

Water Use Permits Sites - South Florida Water Management District — **WELLS**

List of Water Use Permitting Facilities consisting of wells, pumps and culverts, made available by the South Florida Water Management District. The facilities represent a subset of all wells, pumps and culverts associated with Water Use Permits. A Water Use Permit is required for all water uses except single family and duplex use and fire fighting.

Water Well Completions - Northwest Florida Water Management District — **WATER WELLS**

A list of existing well permits provided by the Northwest Florida Water Management District, representing records for wells permitted for construction/repair/abandonment beginning in the year 1976; does not typically contain data on wells constructed prior to 1976. The data provided may therefore only represent a fraction of existing wells. The data are provided by water well contractors on completion reports and, in most cases, has not been verified by District staff.

Water Well Completions - St. Johns River Water Management District — **WATER WELLS**

A list of wells in the Water Well Completion Report database made available by the St. Johns River Water Management District (SJRWMD). The SJRWMD advises that data reported in the Water Well Completion Report are obtained from multiple sources, including SJRWMD, delegated counties, and other regulatory agencies; that they cannot assure that contributors have used consistent measurement techniques or adhered to approved quality control standards; and that, although the SJRWMD has made reasonable attempts to assure the quality of the data contained herein, in most cases, the information is reported as received.

Water Well Completions - Suwanee River Water Management District — **WELLS**

A list of wells in the Water Well Completion Report database made available by the Suwanee River Water Management District department (SRWMD). The SRWMD advises that data reported in the Water Well Completion Report are obtained from multiple sources, including SRWMD, delegated counties, and other regulatory agencies; that they cannot assure that contributors have used consistent measurement techniques or adhered to approved quality control standards; and that, although the SRWMD has made reasonable attempts to assure the quality of the data contained herein, in most cases, the information is reported as received.

Water Well Construction Permits — **WELL CONST PERM**

Appendix

A list of water well construction permits issued by the St. Johns River Water Management District (SJRWMD).

Water Well Construction Permits - Southwest Florida Water Management District **WATER WELLS**

Locations of well construction sites permitted within the District, including historical sites. A Well Construction Permit is required prior to installation of a water well within the District. The permits ensure that wells are constructed by qualified contractors and meet rigid safety and durability standards.

Water Wells - Suwanee River Water Management District **WATER WELLS**

A list of water wells made available by the Suwanee River Water Management District department (SRWMD). The SRWMD advises that data are obtained from multiple sources including SRWMD, delegated counties, and other regulatory agencies; that they cannot assure that contributors have used consistent measurement techniques or adhered to approved quality control standards; and that, although the SRWMD has made reasonable attempts to assure the quality of the data contained herein, in most cases, the information is reported as received.

Well Surveillance Program Water Wells **WATER WELLS**

A list of privately and publicly owned potable wells from the Florida Department of Health's (DOH) Well Surveillance Program.

1.0 EXECUTIVE SUMMARY

Cameron-Cole, LLC (Cameron-Cole) has completed an Environmental Screening Report (ESR) for an approximately 45.5-acre tract of land identified as the Baptist Health Care "E" Street Campus located in Pensacola, Escambia County, Florida hereinafter referred to as the "property" or "subject property". The primary mailing address for the campus is 1000 West Moreno Street, Pensacola, Florida 32501-7500. The assessment was performed in accordance with the Master Agreement for Consulting Services, dated December 14, 2020, between Cameron-Cole, LLC and Baptist Health Care (BHC), and the scope of services specified in Cameron-Cole's Proposal Number 482-4158. This ESR is not to be construed as a Phase I Environmental Site Assessment meeting ASTM International Standard Practice 1527-21 or United States Environmental Protection Agency (U.S. EPA) All Appropriate Inquiry (AAI) standards. This ESR was limited to a desktop review of historical records and documentation of the subject property and surrounding area and did not include a site reconnaissance or inspection. The goal of this ESR is to evaluate the current and historical conditions of the subject property to identify potential environmental concerns (ECs) in connection with the subject property.

Site Description and Use

According to documentation provided by BHC and the Escambia County Property Appraiser's (Property Appraiser) online records, the subject property consists of some 61 generally contiguous parcels of land totaling 45.5 acres that are currently owned by various entities associated with BHC, including Baptist Hospital, Inc., Baptist Health Care Corp, and Baptist Health Ventures, Inc. The attached Table 1 details the addresses, parcel identification numbers, and approximate acreage of each parcel. Figure 1 shows the locations of the 61 parcels, which collectively encompass an approximately 20 block area that is bounded by West Lakeview Avenue to the north, North "D" Street to the east, West Blount Street to the south, and North "J" Street to the west. The main hospital complex is located on a 19.9-acre parcel (Parcel ID No. 00-0S-00-9050-001-058) that is currently developed with a 6-story hospital building that comprises some 412,790 square feet (sq ft) and was originally constructed in 1949. The main hospital has been expanded/renovated several times and is identified by the Property Appraiser as having an effective year built of 1995. The Property Appraiser also identifies six additional buildings/structures on the parcel that were constructed between 1963 and 1989 and collectively comprise an additional 92,881 sq ft. The hospital complex is located within a predominantly residential area with neighborhood commercial businesses located along North "E" Street which transects the campus from north to south along the east side.

Historical Information

Based on various historical resources reviewed, the first development of the subject property appears to have occurred sometime prior to 1921. The primary street grid in the area is apparent by 1921 as shown in a historical topographic map, although no structures or improvements are depicted. A 1940 aerial photograph depicts the site as largely undeveloped land with the exception of a few apparent residential structures located on the western portions of the current campus. The Kupfrian House, originally constructed in 1901, is apparent on the north side of West Moreno Street, just west of the main hospital's current location. Approximately eight, apparent residential structures, including the Kupfrian House are shown on the1944 topographic map. Construction of the hospital began in 1949 with the development of the original hospital completed by 1950 as detailed on a Fire Insurance Map. The original hospital complex,

which consisted of two main structures, was constructed near its current location, north of West Moreno Street, south of West Avery Street, and east of the North “G” Street right-of-way. Pensacola Christian School is depicted on the subject property in the current parking area located north of West Avery Street and south of Lakeview Avenue between at least 1958 and 1994. Construction of the first two Professional Office Buildings at 1717 North “E” Street appears to have been completed between 1977 and 1979 with a third tower added by 1994.

The surrounding area appears to have been predominantly undeveloped land with residential development to the south and east until construction of the hospital was completed in the early 1950s. Infill of predominantly residential developments continued through to the present with commercial businesses located along North “E” Street to the east of the subject property and Pace Boulevard approximately 0.50 mile to the west. Many of the current commercial properties in the vicinity of the subject are medical offices or other health-related support businesses. Based on the review of historical information, ECs were not identified associated with the subject property.

Records Review

Selected federal and state environmental regulatory databases as well as responses from state and local regulatory agencies were reviewed. According to the regulatory database search provided by Envirosite Corporation (Envirosite), the subject property was identified in the Aboveground Storage Tank (AST), Historical Aboveground Storage Tank (HIST AST), Underground Storage Tank (UST), Leaking Aboveground Storage Tank (LAST), Leaking Underground Storage Tank (LUST), Resource Conservation and Recovery Act Very Small Quantity Generator (RCRA_VSQG), Resource Conservation and Recovery-NonGenerator (RCRA_NONGEN), Enforcement and Compliance History Online (ECHO), Integrated Compliance Information System (ICIS), Emergency Response Notification System (ERNS), and SPILLS databases. Additional details regarding these database listings are summarized as follows:

- The facility currently maintains five registered ASTs that are used to store petroleum products. Four of the ASTs are associated with the 1000 West Moreno Street address (Florida Department of Environmental Protection or FDEP Facility ID No. 178626031). The ASTs include two 20,000-gallon, double-walled steel diesel tanks, one 10,000-gallon double-walled steel AST containing aviation gasoline, and a 1,400-gallon double-walled steel generator base tank. These ASTs were last inspected on February 15, 2021, and, with the exception of re-painting of the two 20,000-gallon tanks, were determined to be in compliance with applicable regulations. The remaining tank is a 1,000-gallon double-walled steel emergency generator AST that is associated with the 1101 West Moreno Street address (SCC Building, FDEP Facility ID No. 179804832). This tank was also last inspected on February 15, 2021 and was determined to be in compliance.

- The former 7-Eleven Food Store #15329, 1907 North “E” Street (FDEP Facility ID No. 178507718), is identified on the subject property at what is now listed as Baptist Home Health Care, 1901 North “E Street. Based on the records reviewed, two 8,000-gallon USTs used to store leaded and unleaded gasoline were installed on the property in 1975 and were removed in 1988. Correspondence from the Escambia County Department of Health, dated December 15, 1993, indicates no contamination was identified on-site at the time

the tanks were removed. No records of registered USTs currently maintained at the subject property were identified in the records reviewed.

- Three releases of petroleum products have been reported at the subject property. All three of the reported releases are associated with FDEP Facility ID No. 178626031 and have received final regulatory closure. The first release was due to an overfill of 125 gallons of diesel product that was reported on October 19, 1992. Approximately 31 cubic yards of soil were removed from the site and the release was closed via the issuance of a Site Rehabilitation Completion Order (SRCO) on October 21, 1992. A second release was reported on July 12, 2006, when soil contamination was discovered during the replacement of a spill containment vessel (SCV) for a 10,000-gallon UST that was used to fuel the Baptist LifeFlight air ambulance helicopter. Approximately nine tons of petroleum impacted soil were excavated and disposed of at an off-site location. Assessment activities were subsequently completed, and a combined Site Assessment Report and No Further Action (NFA) Proposal was submitted to the FDEP on January 19, 2007. An SRCO was issued for the second release on March 26, 2007. The third release was reported on October 19, 2009, when contamination was discovered during the closure of two USTs. Active remediation was conducted, and the release was closed with a groundwater use restriction on June 1, 2022. The groundwater use restriction is limited to a 200 ft x 200 ft area located around the two existing 20,000-gallon diesel ASTs that are used to provide backup power for the hospital.

- Records indicate the hospital has been registered as a generator of hazardous wastes dating back to the mid 1980s. The facility is currently identified as a VSQG indicating less than 100 kilograms (kg) per month of hazardous waste. This generation rate is equivalent to approximately one-half of a 55-gallon drum per month. Historically the facility was registered as a small quantity generator (SGQ) based on waste generation rate of 100 kg to 1000 kg per month. The facility's hazardous waste ID Number is FLD010395739. Historical wastes generated included spent and off-specification laboratory chemicals such as formalin and ethanol, in addition to paint and printing wastes containing non-halogenated solvents such as xylene and mineral spirits. Records indicate spent laboratory chemicals such as formalin, ethanol, and certain metals are properly disposed via the sanitary sewer system under an industrial wastewater permit issued by a local pubically owned treatment works (POTW) operator, Emerald Coast Utilities Authority or ECUA (Permit No. 1005-13). The facility also generates universal wastes such as spent fluorescent light bulbs and various types of batteries in addition to used oil and oil filters from on-site equipment maintenance activities. The records reviewed indicate these waste streams are also properly managed and disposed or recycled by third-party contractors. The facility has historically been cited for violations regarding its hazardous waste management practices including a Consent Order that was settled in February 1994 (OGC No. 94-0268). However, none of the identified violations involved actual or alleged releases of hazardous waste and all were subsequently addressed to the satisfaction of the regulatory agency. The facility was determined to be in compliance at the date of the last inspection.

Records indicate a private operator formerly located within the Professional Office Building Towers on the subject property, Drlicka & Hyland, PA, also registered as a generator of hazardous wastes in 1986 (FLD981855588). This private operator subsequently registered as a non-generator (RCRA_NONGEN) in 2001 and no violations were identified in connection with this database listing.

- The subject property was identified in the ICIS and ECHO databases (U.S. EPA Facility Registration Service, Registry ID No. 11041384926) in connection with National Pollutant Discharge Elimination System (NPDES) stormwater construction permits that were issued in 2010 and 2011 and expired in 2015 and 2016 (FLR10JY40 and FLR10KY52) for what is identified as the west parking lot expansion. No formal or informal enforcement actions were identified in connection with this database listing. Records in the ECHO database also indicates the facility reported air emission in 2014 and 2017 via the National Emission Inventory (NEI No. 12441311). The NEI Program includes both facility-reported and government augmented emissions. According to the ECHO Air Pollutant Report, the facility reported less than 10 pounds of hazardous air pollutant (HAP) emissions and less than 26 pounds of volatile organic compound (VOC) emissions in both 2014 and 2017.

- The subject property was identified in the ERNS database in connection with an unknown chemical released in the emergency room of Baptist Hospital. The incident occurred on August 15, 2007 and the source of the release was unknown. The release was contained within the emergency room of the hospital with no impact to the environment and is now listed as closed.

- According to the Envirosite Report, the subject property was also identified in the SPILLS database. Records indicate a spill of 10 gallons of diesel fuel was reported on February 11, 2000 (Incident No. 10008). No additional details were identified in connection with this spill, which is now listed as closed.

Surrounding Properties

Selected federal and state environmental regulatory databases were also obtained for surrounding properties located within approximately 0.50 mile radius of the subject property. Based on distance, topographic gradient relative to the subject property, and/or the documented directions of groundwater flow, no other surrounding properties were identified that would present an EC to the Subject property.

Opinions and Conclusions

In summary, Cameron-Cole has performed an Environmental Screening Report, in general conformance with the scope and limitations as stated in the proposal, of an approximately 44.5-acre tract of land located at 1000 West Moreno Street, Pensacola, Escambia County, Florida 32501, the subject property. Evidence of ECs were not identified in connection with the property.

This summary does not contain all the information that is found in the full report. The report should be read in its entirety to obtain a more complete understanding of the information provided and to aid in any decisions made or actions taken based on this information.

2.0 INTRODUCTION

2.1 Property Overview

The subject property consists of some 61 generally contiguous parcels of land totaling 45.445 acres that are currently owned by various entities associated with BHC, including Baptist Hospital, Inc., Baptist Health Care Corp, and Baptist Health Ventures, Inc. Table 1 details the addresses, parcel ID numbers, and approximate acreage of each parcel. Figure 1 shows the locations of the 61 parcels, which collectively encompass an approximately 20 block area that is bounded by West Lakeview Avenue to the north, North "D" Street to the east, West Blount Street to the south, and North "J" Street to the west. The main hospital complex is located on a 19.9-acre parcel (Parcel ID No. 00-0S-00-9050-001-058) that is currently developed with a 6-story hospital building that comprises some 412,790 sq ft and was originally constructed in 1949. The hospital complex is located within a predominantly residential area with neighborhood commercial businesses located along North "E" Street which transects the campus from north to south along the east side.

2.2 Purpose and Scope of Services

Cameron-Cole performed an Environmental Screening Report for a 45.5-acre tract of land identified as the Baptist Healthcare "E" Street Campus, 1000 West Moreno Street, Pensacola, Florida, 32503. The screening was performed in accordance with the Master Agreement for Consulting Services between Cameron-Cole, LLC and BHC (the Client) dated December 14, 2020, and the scope of services specified in Cameron-Cole's Proposal Number 482-4158. This ESR was designed to assist the Client in developing information to identify ECs in connection with the subject property as reflected by the scope of this report.

This purpose was undertaken through User provided information, a regulatory database review, historical and physical records review, including local government inquiries, as applicable, and a visual noninvasive reconnaissance of the exterior portions of the subject property and adjoining properties. Limitations and significant data gaps (if identified) are noted in the applicable sections of the report.

2.3 Significant Assumptions

Historical resources including reviews of federal and state agency files regarding site operations and past historical uses have been considered when presenting Cameron-Cole's findings and opinions. Cameron-Cole assumes that the information provided by all sources and parties, including the User, is accurate and complete, except where obvious inconsistencies or inaccuracies were identified. Although Cameron-Cole made no independent investigation as to the accuracy and completeness of other information derived from secondary sources, Cameron-Cole assumes such information is reliable and representative of site conditions.

2.4 Limitations and Exceptions of Assessment

Based upon the agreed-on scope of services, this ESR did not include an inspection of the subject property or interviews with current owner representatives or occupants. Subsurface or other invasive assessments, vapor intrusion assessments or indoor air quality assessments (i.e., evaluation of the presence of vapors within a building structure), business environmental risk evaluations, or other services not particularly

identified and discussed herein were not performed. Information obtained for this ESR was received from several sources that are believed to be reliable; nonetheless, the authenticity or reliability of these sources cannot and is not warranted hereunder. This ESR is produced in accordance with customary principles and practices in the applicable fields of environmental science and engineering. Cameron-Cole is not responsible for conclusions, opinions, or recommendations made by others based upon the information presented herein.

Although industry standard practices are employed, ESRs are inherently limited, given that findings and conclusions are developed from limited site evaluation and research. In performing an ESR, Cameron-Cole can only rely upon those records regarding the subject property and surrounding properties which are available to the public and which can reasonably be obtained by Cameron-Cole. Cameron-Cole's opinions, conclusions, and recommendations are therefore limited to those which can be derived from such available and reasonably obtainable records. It is often necessary for Cameron-Cole to rely on information prepared or obtained by others to complete an ESR. Cameron-Cole makes no warranty or representation as to the accuracy or completeness of information obtained from third-parties. Additionally, changes may result with the passage of time with respect to characteristics of the subject property and those of surrounding properties. Cameron-Cole and its representatives do not warrant for or against future changes in operations or conditions, nor do they warrant for or against conditions present of a type or at a location not specifically addressed in the ESR.

Subject to the limitations stated herein, the opinions presented in Phase I ESA are valid for a period of 90 days from the date of issuance.

Air, soil, and groundwater testing are not part of an ESR. This ESR is not intended to establish whether air, soil, or groundwater contamination, or waste disposal is present or not present on the subject property or on surrounding properties. Knowledge of actual environmental conditions on the subject property or on any surrounding properties can only be obtained from air, soil, and groundwater testing, the installation of groundwater monitoring wells, and possibly additional testing, all of which are outside the scope of this ESR.

Reasonable efforts were made within the scope of the ESR to identify the presence of USTs, ASTs, and ancillary equipment on or near the subject property. Limitations to the ESR exist regarding to USTs and ASTs, in as much as information was obtained by Cameron-Cole solely through its review of database information. It is possible that additional UST facilities not listed in regulatory database files may exist at the subject property or on properties adjacent to the subject property due to owner/operator registration negligence, filing errors with the state regulatory agency or other reasons over which Cameron-Cole has no control or ability to determine.

Conclusions in the ESR regarding potential environmental impact of properties and facilities surrounding the subject property are based upon reasonably available information obtained from environmental databases and inferred groundwater flow direction. Actual groundwater conditions on the subject property, including flow direction, can only be definitively ascertained through the installation and gauging of at least three on-site groundwater monitoring wells, which is outside the scope of this ESR. No environmental assessment can wholly eliminate uncertainty regarding the potential for ECs in connection with a property. Performance of a

ESR is solely intended to reduce, but not eliminate, uncertainty regarding the potential for ECs in connection with the subject property, and this practice recognizes reasonable limits of time and cost.

The ESR has been prepared for the exclusive use and benefit of BHC, subject to the terms and conditions specified in the Master Agreement between Cameron-Cole, LLC and BHC. The ESR is for the sole and exclusive use and benefit of BHC, our Client, the User. Cameron-Cole makes no warranty as to the ESR except as to BHC'S exclusive use of the ESR. The Client bears the sole responsibility for ensuring that the ESR is distributed or disseminated to only those third parties to whom BHC are strictly obligated by contract, law, regulation, or ordinance to provide it. Cameron-Cole disclaims any and all liability to any person or entity other than BHC who uses or relies on the ESR any way whatsoever without the express written consent of both BHC and Cameron-Cole.

3.0 PHYSICAL SETTING

3.1 Site and Vicinity Characteristics

According to documentation provided by BHC and the Escambia County Property Appraiser's online records, the subject property consists of some 61 generally contiguous parcels of land totaling 45.5 acres The parcels collectively encompass an approximately 20 block area that is bounded by West Lakeview Avenue to the north, North "D" Street to the east, West Blount Street to the south, and North "J" Street to the west. The main hospital complex is located on a 19.9-acre parcel (Parcel ID No. 00-0S-00-9050-001-058) that is currently developed with a 6-story hospital building that comprises some 412,790 sq ft and was originally constructed in 1949. The main hospital has been expanded/renovated several times and is identified by the Property Appraiser as having an effective year built of 1995. The Property Appraiser also identifies six additional buildings/structures on the parcel that were constructed between 1963 and 1989 and collectively comprise an additional 92,881 sq ft. Surrounding buildings on the subject property are utilized as medical facilities or office spaces. The hospital complex is located within a predominantly residential area with neighborhood commercial businesses located along North "E" Street which transects the campus from north to south along the east side. A Site Vicinity Map depicting the subject and adjoining properties is provided in Figure 2.

3.2 Topography

The USGS 7.5 Minute Series, Pensacola, Florida quadrangle map published in 2021 was reviewed to establish physical setting of the subject property and surrounding area. According to the Envirosite Report site summary, the subject property is approximately 64 ft above mean sea level and the site grades gently to the south.

3.3 Soils/Geology

A Soil Survey Map was obtained from the Envirosite Report from information provided by the United States Department of Agriculture (USDA) of the subject property's general area. The soil components for the subject property are identified as Lakeland Series, a non-hydric, sand that is characterized as excessively drained, Troup Series, a non-hydric sand that is characterized as somewhat excessively drained, Escambia Series, a non-hydric, fine loamy sand characterized as somewhat poorly drained, and Bonifay Series, a non-hydric loamy sand characterized as being well drained soil.

3.4 Hydrology

Based on topographic maps and assuming groundwater flow follows surface topography, the groundwater flow in the vicinity of the subject property is inferred to be to the south towards Pensacola Bay. It must be noted that groundwater flow direction can be influenced by factors such as surface topography, underground structures, tidal influences, seasonal fluctuation, soil, and bedrock geology, and pumping from production wells which were not considered in this interpretation. Therefore, actual groundwater flow direction under the subject property can only be determined conclusively through use of groundwater wells and collection of depth-to-water and surface elevation measurements.

4.0 USER PROVIDED INFORMATION

4.1 Title Records

A historical chain-of-title report was not provided by the User of the report nor obtained by Cameron-Cole as part of the approved scope of services for this project. Ms. Jessica Andrade, in house counsel with Baptist Health Care, provided Cameron-Cole with a list of parcels that comprise the subject property including associated Property Appraiser Parcel Numbers, the Official Record Book and Page numbers from Clerk of the Court, the acreage for each parcel, owner information, and zoning information. This information is summarized on the attached Table 1.

4.2 Environmental Liens or Activity and Use Limitations

A search of recorded land title records for environmental liens was not provided by the User of the report nor obtained by Cameron-Cole as part of the approved scope of services for this project. Cameron-Cole conducted a review of environmental records for the subject property using the FDEP's Oculus and Maps Direct online records including the Institutional Controls Registry. The subject property was not identified in in the Institutional Controls Registry. However, a conditional SRCO with a recorded Declaration of Restrictive Covenant (DRC), dated January 10, 2022, was issued for an approximately 0.92 acre portion of Parcel No.00-0S-00-9050-001-058. The DRC was recorded by Baptist Hospital, Inc. in Official Record Book/Instrument #8704, Page 939. The DRC prohibits extraction or use of groundwater from within a 200 ft x 200 ft area of the parcel. A copy of the CSRCO and DRC are included in Appendix A.

5.0 RECORDS REVIEW

5.1 Standard Environmental Record Sources and Review

Envirosite provided Cameron-Cole with a comprehensive government agency information search, the regulatory search information and a legend of the database acronyms are presented as Appendix B, Regulatory Agency Search Report. Maps depicting properties listed in the various databases searched by Envirosite also provided. The table below provides a summary of the federal records reviewed along with each record's search distance from the subject property (SP).

STANDARD ENVIRONMENTAL DATABASE RECORD SUMMARY

SUBJECT PROPERTY

According to the regulatory database search provided by Envirosite, the subject property was identified in the AST, HIST AST, UST, LAST, LUST, RCRA_VSQG, RCRA_NONGEN, ERNS, and SPILLS databases. Additional details regarding these database listings are summarized as follows:

The facility currently maintains five registered ASTs that are used to store petroleum products. Four of the ASTs are associated with the 1000 West Moreno Street address (FDEP Facility ID No. 178626031). The ASTs include two 20,000-gallon, double-walled steel diesel tanks, one 10,000-gallon double-walled steel AST containing aviation gasoline, and a 1,400-gallon double-walled steel generator base tank. These ASTs were last inspected on February 15, 2021, and, with the exception of re-painting of the two 20,000-gallon tanks, were determined to be in compliance with applicable regulations. The remaining tank is a 1,000-gallon double-walled steel emergency generator AST that is associated with the 1101 West Moreno Street address (SCC Building, FDEP Facility ID No. 179804832). This tank was also last inspected on February 15, 2021 and was determined to be in compliance.

The former 7-Eleven Food Store #15329, 1907 North “E” Street (FDEP Facility ID No. 178507718), is identified on the subject property at what is now listed as Baptist Home Health Care, 1901 North “E Street. Based on records reviewed two, 8,000-gallon USTs used to store leaded and unleaded gasoline were installed on the property in 1975 and were removed in 1988. Correspondence from the Escambia County Department of Health dated December 15, 1993 indicates no contamination was identified on-site at the time the tanks were removed. Records indicate five USTS were also previously present on the main campus and were registered under Facility ID No. 178626031. According to the Envirosite Report, three of the USTs were removed and two were closed in place. No records of registered USTs currently maintained at the subject property were identified in the records reviewed.

Three releases of petroleum products have been reported at the subject property. All three of the reported releases are associated with FDEP Facility ID No.178626031 and have received final regulatory closure. The first release was due to an overfill of 125 gallons of diesel product that was reported on October 19, 1992. Approximately 31 cubic yards of soil were removed from the site and the release was closed via the issuance of an SRCO on October 21, 1992.

A second release was reported on July 12, 2006, when soil contamination was discovered during the replacement of a spill containment vessel for a 10,000-gallon UST that was used to fuel the Baptist LifeFlight air ambulance helicopter. Approximately nine tons of petroleum impacted soil were excavated and disposed of at an off-site location. Assessment activities were subsequently completed and a combined Site Assessment Report and NFA Proposal was submitted to the FDEP on January 19, 2007. An SRCO was issued for the second release on March 26, 2007.

The third release was reported on October 19, 2009, when contamination was discovered during the closure of two USTs. Active remediation was completed and the release was closed with a groundwater use restriction on June 1, 2022. The groundwater use restriction is limited to a 200 ft x 200 ft area located around the two existing 20,000-gallon diesel ASTs that are used to provide backup power for the hospital. Copies of the regulatory closure letters for each of the reported petroleum releases and other documentation obtained during the file review are provided in Appendix A.

Records indicate the hospital has been registered as a generator of hazardous waste dating back to the mid-1980s. The facility is currently classified as a VSQG indicating less than 100 kg per month of hazardous waste. This generation rate is equivalent to approximately one-half of a 55-gallon drum per month. Historically the facility was registered as a SQG based on waste generation rate of 100 kg to 1000 kg per month. The facilities hazardous waste ID number is FLD010395739. Historical wastes generated included spent and off-specification laboratory chemicals such as formalin and ethanol, in addition to paint and printing wastes containing non-halogenated solvents such as xylene and mineral spirits. Records indicate spent laboratory chemicals such as formalin, ethanol and certain metals are properly disposed of via the sanitary sewer system under an industrial wastewater permit issued by a local POTW operator, ECUA (Permit No. 1005-13). The facility also generates universal wastes such as spent fluorescent light bulbs and various types of batteries in addition to used oil and oil filters from on-site equipment maintenance activities. Records reviewed indicate these waste streams are also properly managed and disposed or recycled by third-party contractors. The facility has historically been cited for violations regarding its hazardous waste management practices including a Consent Order that was settled in February 1994 (OGC #94-0268). However, none of the identified violations involved actual or alleged releases of hazardous waste and all were subsequently addressed to the satisfaction of the regulatory agency. The facility was determined to be in compliance at the date of the last inspection in 2004.

Records indicate a former tenant of the Professional Office Building towers on the subject property, Drlicka & Hyland, PA, also registered as a generator of hazardous wastes in 1986 (FLD981855588). This private operator subsequently registered as a non-generator (RCRA_NONGEN) in 2001 and no violations were identified in connection with this database listing.

The subject property was identified in the ERNS database in connection with an unknown chemical released in the emergency room of Baptist Hospital. The incident occurred on August 15, 2007, and the source of the release was unknown. The release was contained within the emergency room of the hospital with no impact to the environment and is now listed as closed.

According to the Envirosite Report, the subject property was also identified in the SPILLS database. Records indicate a spill of 10 gallons of diesel fuel was reported on February 11, 2000 (Incident No. 10008). No additional details were identified in connection with this spill, which is now listed as closed.

FEDERAL, STATE, AND TRIBAL REGISTERED STORAGE TANK LISTS

According to the Envirosite Report, there are four AST sites located within the search radius of the subject property. FMC Pensacola Dialysis, 1305 West Moreno Street, is located 0.027 miles west-southwest (inferred crossgradient) from the subject property maintains a 640-gallon, double-walled steel diesel AST associated with an emergency generator. Lakeview Center, 1221 West Lakeview Avenue, located 0.042 miles north (inferred upgradient) from the subject property maintains an 850-gallon, double-walled steel diesel AST associated with an emergency generator. Neither of these sites have reported violations or releases in connection with the ASTs. The remaining two sites are located on the subject property and are discussed in the preceding section above under the regulatory database listings identified for the subject property.

According to the Envirosite Report, there are two UST sites located within the search radius of the subject property. Glen's Service Stations, Inc., 2101 North "E" Street, is located 0.124 mile north-northeast (inferred upgradient) from the subject property. Records indicate the site is currently undergoing post active remediation monitoring (PARM) associated with a release of petroleum products that was reported in September 2008. According to an October 11, 2022 PARM Report, only one monitoring well was exhibiting groundwater impacts above established action levels and the contamination did not extend off-site. The remaining site is the former 7-Eleven Food Store #15329 located on the subject property at 1901 North "E" Street and is discussed in the preceding section above under the regulatory database listings identified for the subject property.

FEDERAL, STATE, AND TRIBAL LEAKING STORAGE TANK LISTS

According to the Envirosite Report, there are four LAST sites located within the search radius of the subject property. Records indicate three of these sites have received regulatory closure and did not require further action. The remaining site is located on the subject property and is discussed in the previous section above under database listings for the subject property.

According to the Envirosite Report, there are 21 total LUST incidents sites located within the search radius of the subject property, including three listings for the subject property that are discussed in the previous section above. Based on a review of available records, all but five of these sites have either been issued SRCOs or NFA orders or did not require cleanup for the reported release. Four of the five open sites are located more than 0.25 mile from the subject property along North Pace Boulevard at inferred crossgradient positions. The remaining site, Glen's Service Stations, Inc., 2101 North "E" Street, is located 0.124 mile north-northeast (inferred upgradient) from the subject property. Records indicate the site is currently PARM associated with a release of petroleum products that was reported in September 2008. According to an October 11, 2022 PARM Report, only one monitoring well was exhibiting groundwater impacts above established action levels and the contamination did not extend off-site.

STATE INSTITUTIONAL CONTROLS / ENGINEERING CONTROLS REGISTRIES

According to the Envirosite Report, there are two remediation sites with ENGINEERING CONTROLS located within the approximate minimum search distance (AMSD) of the subject property. Gulf Power West Substation and Gulf Power North Substation (ERIC_6749) were identified and records indicate both sites have been issued Conditional SRCOs with digging restrictions due to the presence of arsenic in the site soils.

HISTORICAL CERCLIS LIST

According to the Envirosite Report, there is one CERCLIS-HIST site located within the AMSD of the subject property. Professional 1 Hour Cleaners, 1595 North Pace Boulevard, is located 0.265 miles west-southwest (inferred crossgradient) from the subject property. This site was also identified in the DRYCLEANERS, LUST, and State Hazardous Waste Site-Environmental Restoration Integrated Cleanup (SHWS-ERIC) databases. Records indicate the site underwent a Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) site screening in 2012 but did not qualify for listing on the National Priorities List (NPL) and was referred for state-funded cleanup. According to records obtained

from the FDEP's Oculus database (ERIC_4636), soil and groundwater impacted with chlorinated solvents have been documented at the site. An August 2020 Site Assessment Report indicates the groundwater plume is located on the west side of North Pace Boulevard with the inferred eastern plume limit extending into the southbound right-of-way. The report also indicates the direction of groundwater flow at the site is to the south, crossgradient from the subject property.

STATE AND TRIBAL EQUIVALENT CERCLIS

The SHWS - ERIC database set includes all sites in Florida that have been assigned ERIC identification numbers and may include facilities also identified in the Superfund NPL, CERCLA Site Screening Program, State-Funded Cleanup Program, State-Owned Lands Cleanup Program, Site Rehabilitation Program, Hazardous Waste Cleanup Program, Petroleum Restoration Program, Department of Defense, Formerly Used Defense Site, Drycleaning Solvent Cleanup Program (DSCP), Responsible Party Cleanup, Site Investigation Section, and Brownfield Site Rehabilitation data sets. According to the Envirosite Report, there are seven SHWS – ERIC database located within the AMSD of the subject property; however, one site is a duplicate location. One of the sites received an SRCO with Conditions in September 2010. The remaining sites are located at least 0.25 miles from the subject property at inferred crossgradient or downgradient positions. One site is located upgradient, 0.354 miles away from the subject property, and has received regulatory closure.

LOCAL LISTS OF HAZARDOUS WASTE/CONTAMINATED SITES

According to the Envirosite Report, there are five Responsible Party – Florida (RESP PARTY – FL) cleanup sites located within the AMSD of the subject property. Three of the sites received an SRCO with Conditions, the other two database listings are associated with the Professional 1 Hour Cleaners site discussed above which is located 0.265 miles west-southwest (inferred crossgradient) from the subject property.

5.2 Additional Environmental Record Sources and Review

The table below provides a summary of the other ascertainable environmental records reviewed along with each record's AMSD from the subject property.

OTHER ASCERTAINABLE RECORDS SUMMARY

SP = Subject property

SUBJECT PROPERTY

The subject property was identified in the ECHO database. Cross-reference of the ECHO database with the US EPA's Facility Registration Service web page (FRS Registry ID No. 11041384926) also identified database listings in the US EPA's Integrated Compliance Information System (ICIS). The ICIS-NPDES is an information management system maintained by the Office of Compliance to track permit compliance and enforcement status of facilities regulated by the National Pollutant Discharge Elimination System (NPDES) under the Clean Water Act (CWA). Records indicate two NPDES stormwater construction permits were issued in 2010 and 2011 and expired in 2015 and 2016 (FLR10JY40 and FLR10KY52) for what are identified as the west parking lot expansions. No formal or informal enforcement actions were identified in connection with this database listing. Records in the ECHO database also indicate the facility reported air emissions in 2014 and 2017 via the National Emission Inventory (NEI No. 12441311/AIR_0330009). The NEI Program includes both facility-reported and government augmented emissions. According to the ECHO Air Pollutant Report, the facility reported less than 10 pounds of HAP emissions and less than 26 pounds of VOC emissions in both 2014 and 2017.

FORMERLY USED DEFENSE SITES (FUDS)

According to the Envirosite Report, there is one FUDS located within the AMSD of the subject property. The Washington Court Housing property is located 0.260 miles southwest (inferred crossgradient) of the subject property. According to the 2019 Annual FUDS Program Management Action Plan prepared by the U.S. Army Corps of Engineers, the Washington Court Housing Site (FUDS Number I04FL0848) consists of 2.07 acres of property that is currently used as housing. The report indicates no Installation Restoration Program Projects are planned or funded for the property.

FLORIDA GROUNDWATER CONTAMINATION AREAS (GWCA)

According to the Envirosite Report, there are two GWCA sites located within the AMSD of the subject property. A Florida Groundwater Contamination Area, also known as a Delineated Area pursuant to Chapter 62-524, Florida Administrative Code (F.A.C.), is defined as an area within which groundwater contamination is known to exist or which encompasses vulnerable areas or areas in which the Department provides a subsidy for restoration or replacement of contaminated drinking water supplies. According to the Envirosite Report, an area of groundwater impacted by trichloroethylene (TCE) is located approximately 0.376 miles south (inferred downgradient) of the subject property and an area impacted by fluoride, nitrate, trichlorethylene, tetrachloroethylene, 1,2-dichlorethane, benzene, and 1, 2- dichloroethene located approximately 0.410 mile northeast (inferred crossgradient) of the subject property.

FLORIDA DRYCLEANERS/PRIORITY CLEANERS

According to the Envirosite Report, there is one DRYCLEANERS - FL site located within the AMSD of the subject property. Professional 1 Hour Cleaners, 1595 North Pace Boulevard, is discussed under the CERCLIS-HIST database listing above.

SITE INVESTIGATION SECTION (SIS)

According to the Envirosite Report, there is one SIS site located within the AMSD of the subject property. Professional 1 Hour Cleaners, 1595 North Pace Boulevard, is discussed under the CERCLIS-HIST database listing above.

5.3 Vapor Encroachment Condition Summary

Cameron-Cole conducted a review of available environmental records and conditions observed on the subject property and adjoining parcels to evaluate the potential for a vapor encroachment condition (VEC) to exist on the subject property. Based on the inferred groundwater gradient, depth to groundwater, and physical setting information, the potential for a VEC to exist on the subject property cannot be ruled out based on existing data. Although the records reviewed indicate there are no open violations or releases of hazardous substances or petroleum products on the subject property or on nearby parcels that would be expected to create a VEC, a release of petroleum products that was reported in October 2009 was conditionally closed with groundwater use restrictions in June 2022. A review of supporting documentation associated with the DRC indicates the remaining groundwater impact is limited to a single shallow monitoring well located in a

landscaped area near the existing ASTs and north of the Energy Center. The identified constituents of concern include VOCs.

5.4 Unmappable Sites

The Envirosite Report contains a summary for those sites that may be located in the general area of the subject property; yet do not have adequate location addresses or latitude/longitude coordinates to pinpoint their location in relation to the subject property. No sites were identified in the Unmappable Summary.

5.5 Additional Environmental Record Sources

5.5.1 County Property Assessor/Appraiser

The subject property is comprised of 61 total parcels totaling approximately 44.45 acres of land. The land consists of mainly commercial property with multiple structures including Baptist Hospital "E" Street Campus, medical facilities, and office spaces. Historical information reviewed indicates the subject property was developed as early as 1901 with residential structures and gradually transitioned to commercial property. The largest parcel is occupied by Baptist Hospital, a 6-story, 412,790 total sq ft medical facility developed in 1949. The surrounding area consists of a mixture of residential and commercial structures.

5.5.2 Fire/Police Officials

Cameron-Cole contacted the City of Pensacola Fire Department via email on July 27, 2022. A response indicated the Department was dispatched to the subject property on two different incidents. The incidents occurred at Baptist Hospital Main Campus, located at 1000 West Moreno Street. Reports indicate on June 25, 2019, the fire alarm was activated by a fire in the laundry room. When officials arrived on scene, the fire had already been extinguished with dry chemical extinguishers by hospital staff. The other incident occurred on February 14, 2020, when responders arrived on scene for a reported grease fire in the kitchen. The fire had already been extinguished when the fire department personnel arrived on scene. Reports indicate the kitchen was well ventilated and no damages were reported from either incident.

5.5.3 Other Record Sources

Cameron-Cole conducted a review of environmental records for the subject and adjoining properties using the FDEP's Oculus and Maps Direct Online Records. The subject property was identified in the Petroleum Contamination Monitoring of Discharges (PCTS) and the Compliance and Enforcement Tracking for Hazardous (CHAZ) databases. The PCTS database is associated with multiple releases of petroleum products from the USTs that were formerly located on the subject property. These identified releases are discussed in the preceding section above under the regulatory database listings identified for the subject property and have all received regulatory closure. The CHAZ database is associated with the status of the subject property as a generator of hazardous waste. A hazardous waste inspection conducted on June 5, 2001, indicated the subject property is identified as a Conditionally Exempt Small Quantity Generator. According to the records reviewed, the most recent inspection conducted on May 20, 2004 issued a status of compliance for the facility.

6.0 HISTORICAL USE INFORMATION

Available historical resources were consulted to develop a history of the previous uses of the property, to help identify the likelihood of past uses having led to ECs in connection with the property. Copies of the aerial photographs, historical topographic maps, City Directory Image Report, and Fire Insurance Maps, if available, are provided in Appendix D.

Based on various historical resources reviewed, the first development of the subject property appears to have occurred in 1901 with development of a residential structure on the southwest corner of the subject property. Construction of the main campus hospital began in 1949 and development of the property continued up until current structures. The subject property is mostly developed and utilized as a medical campus for Baptist Health Care.

6.1 Aerial Photographs

The aerial photographs described below were obtained from Envirosite. Copies of the 1940, 1951, 1958, 1965, 1973, 1981, 1990, 1994, 1999, 2005, 2007, 2010, 2013, 2015, 2017, and 2019 aerial photographs are provided in Appendix D.

Date: 1940 - 1981
Scale: 1" = 500'
Description of Subject Property: Prior to development, the subject property consists of mainly wooded land. The first development of the subject property appears to have occurred sometime prior to 1921. A 1940 aerial photograph depicts the site as largely undeveloped land with the exception of a few apparent residential structures located on the western portions of the current campus. The Kupfrian House, originally constructed in 1901, is apparent on the north side of West Moreno Street, just west of the main hospital's current location. Construction of the hospital began in 1949 with the development of the original hospital completed by 1950 as detailed on a Fire Insurance Map. The original hospital complex, which consisted of two main structures, was constructed near its current location, north of West Moreno Street, south of West Avery Street, and east of the North "G" Street right-of-way. Pensacola Christian School is depicted on the subject property in the current parking area located north of West Avery Street and south of Lakeview Avenue between at least 1958 and 1994. Construction of the first two Professional Office Buildings at 1717 North "E" Street appears to have been completed between 1977 and 1979 with a third tower added by 1994.

Adjoining North: Commercial structures utilized as mental health facilities, apartments, and single residential structures.
Adjoining East: Residential structures.
Adjoining South. Developed for residential and commercial use. Properties include medical buildings, office spaces, and residential structures.
Adjoining West: Undeveloped, urban land and a pond.
Surrounding Area: The surrounding area appears to have been predominantly undeveloped land with residential development to the south and east until construction of the hospital was completed in the early 1950's. Infill of predominantly residential developments continued through to the present with commercial businesses located along

North “E” Street to the east of the subject property and Pace Boulevard approximately 0.50 mile to the west.

Date: 1993 - 2019
Scale: 1” = 500’
Description of Subject Property: The main hospital has been expanded/renovated several times and is identified by the Property Appraiser as having an effective year built of 1995. The images also identify six additional buildings/structures on the parcel that were constructed between 1963 and 1989 and collectively comprise an additional 92,881 sq ft according to the Property Appraiser’s online records. The hospital complex is located within a predominantly residential area with neighborhood commercial businesses located along North “E” Street which transects the campus from north to south along the east side. The current visual of the subject property is depicted in the 2017 aerial image with all structures

Adjoining North: Mixture of commercial and residential properties including mental health facilities, apartments, and single residential structures.
Adjoining East: Residential properties.
Adjoining South: Medical buildings, office spaces, and residential structures.
Adjoining West: Residential properties and pond.
Surrounding Area: The general vicinity of the subject property is developed land with a mixture of residential and commercial property. Many of the current commercial properties in the vicinity of the subject are medical offices or other health-related support businesses.

6.2 Fire Insurance Maps

The Historical Information Gatherers (HIG) Historical Map Collection and the United States Library of Congress Map Collection were searched for Fire Insurance Maps (FIMs), real estate atlases, and similar maps for the subject property and adjoining properties. These maps were used to create a multi-page file named FIM+Maps. According to the information provided by Envirosite, there is a 1950 and 1979 image depicting a portion of the subject property. The 1950 image depicts Baptist Hospital and the Crippled Children’s Hospital, the buildings have stairs but no other depictions within the structure. The 1979 image shows a more developed Baptist Hospital and Crippled Children’s Hospital. There is also a Professional Office Building to the east, a clinic to the south, and Pensacola Christian Grade School to the north of Baptist Hospital. There are dwellings located to the northwest and southeast of BHC.

6.3 Recorded Land Title Records

A historical chain-of-title report was not provided by the User of the report nor obtained by Cameron-Cole as part of the approved scope of services for this project. According to online records maintained by the Escambia County Clerk of Courts, the majority of the structures were originally developed for residential use and have been purchased by Baptist Health Care.

6.4 Historic USGS Topographic Maps

The historical topographic maps were obtained from Envirosite. Copies of the 1921, 1941, 1942, 1944, 1970, 1994, 2012, 2015, and 2018, topographic maps are provided in Appendix A.

Date: 1921 - 1944
Scale: 1: 62,500 (15 minute); 1:25,000 for the 1944 map (7.5 minute).
Description of Subject Property: The subject property shows undeveloped land until the 1941 image where multiple structures appear on the southwest and eastern portions of the property. The western most portion of the property has wooded areas and there are multiple roadways transecting the property.

Adjoining North: Developed land with residential structures.
Adjoining East: Developed land with residential structures.
Adjoining South: Developed land with structures or improvements.
Adjoining West: Undeveloped land with no structures or improvements. There are some wooded areas and ponds also located to the west.
Surrounding Area: Developed land of residential and commercial properties, a wooded area with a pond to the west.

Date: 1970 - 2018
Scale: 1:24,000 (7.5 minute)
Description of Subject Property: The 1970 image shows the Baptist Hospital Structure developed on the subject property along with four other structures, the area surrounding the subject property is undergoing development, the images depict schools, roadways, a highway, a cemetery, and other features. There are roadways that transect the subject property. The 2012, 2015, and 2018 image do not depict any structures besides the hospital on the property.

Adjoining North: Developed land with no structures or improvements visible.
Adjoining East. Developed land with no structures or improvements visible.
Adjoining South: Developed land with no structures or improvements visible.
Adjoining West: Developed land with no structures or improvements visible.
Surrounding Area: Developed urban land, a pond located to the west, hospital buildings, and schools.

6.5 Local Street Directories

Historical street directories for the subject property and surrounding property addresses were provided by Envirosite. West Avery Street, West Blount Street, North “E” Street, North “F” Street, North “J” Street, West Lakeview Avenue, West Mallory Street, West Moreno Street were identified within the City Directory for date ranges dating back to 1921 to 2018. Individuals associated with addresses within the subject property were identified in multiple listings. The locations were primarily residential homes until Baptist Health Care purchased the properties as the campus grew and expanded. Seven-Eleven Service Stores Inc. was identified at 1907 North “E” Street in the 1978 and 1983 city directory listings. This site, now listed as Baptist Home Health Care, 1901 North “E Street is located on the subject property. This site is discussed in preceding sections above under the regulatory database findings for the subject property.

6.6 Historical Use Information on Adjoining Properties

The following is a summary of adjoining property historical uses based on a review of the historical records reviewed in Section 5.7.

North: Adjoining properties to the north appear to have been developed for residential and commercial use. Properties include apartment complexes, mental health centers, and residential structures.

East: Adjoining property to the east appears to be wooded, undeveloped land until residential properties were developed.

South: Adjoining property to the south appears to be developed for residential and commercial use. Properties include medical buildings, office spaces, and residential structures.

West: Adjoining property to the west includes a mixture of wooded areas, a retirement community complex, residential structures, and a pond.

7.0 INTERVIEWS

7.1 State and/or Local Government Officials

Cameron-Cole contacted the City of Pensacola Fire Department via email on July 27, 2022. A response indicated the department was dispatched to the subject property on two different incidents. The incidents occurred at Baptist Hospital Main Campus, located at 1000 West Moreno Street. The reports indicate on June 25, 2019, the fire alarm was activated by a fire in the laundry room. When officials arrived on scene, the fire had already been extinguished with dry chemical extinguishers by hospital staff. The other incident occurred on February 14, 2020, when responders arrived on scene for a reported grease fire in the kitchen. The fire had already been extinguished when the fire department personnel arrived on scene. Reports indicate the kitchen was well ventilated and no damages were reported from either incident.

Cameron-Cole contacted Ms. Denise Weeks, Florida Department of Health in Escambia County via email on July 27, 2022, to request records regarding, hazardous material or petroleum product storage, storage tanks, or other environmental concerns associated with the property. A response indicated there was no record of environmental concerns on the subject property.

8.0 OPINIONS AND CONCLUSIONS

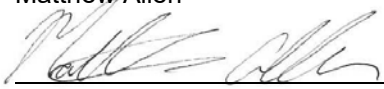
In summary, Cameron-Cole has performed an Environmental Screening Report, in general conformance with the scope and limitations as stated in the proposal, of an approximately 44.5-acre tract of land located at 1000 West Moreno Street, Pensacola, Escambia County, Florida 32501, the subject property. Evidence of ECs were not identified in connection with the subject property.

9.0 DECLARATION

The following Cameron-Cole personnel were involved with the site inspection, records search, regulatory review, and drafting of the Environmental Screening Report for an approximately 44.45-acre property located at the Baptist Health Care "E" Street Campus, Pensacola, Escambia County, Florida.

Prepared by:

Matthew Allen

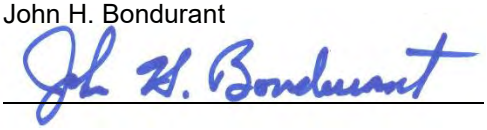


12/21/22

This is to certify that I have reviewed and approve the contents of the Environmental Screening Report for an approximately 44.45-acre property located at the Baptist Health Care "E" Street Campus, Pensacola, Escambia County, Florida. Qualifications of the environmental professional are provided in Appendix C.

Reviewed by:

John H. Bondurant



12/21/22

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in 312.10 of 40 CFR 312, and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property.

John H. Bondurant

Envirosite's Historical Topographic Map Report is designed to assist in evaluating a subject property resulting from past activities. Envirosite's Historical Topographic Map Report includes a search of USGS historical topographic maps, dating back to the early 1900s.

TOPOGRAPHIC MAPS FOUND:

	Map Name:	Year:	Revision Year:	Scale:
1.	Pensacola	1921	N/R	1 : 62500
2.	Pensacola	1941	N/R	1 : 62500
3.	Pensacola	1942	N/R	1 : 62500
4.	Pensacola	1944	N/R	1 : 25000
5.	Pensacola	1970	1987	1 : 24000
6.	Pensacola	1970	N/R	1 : 24000
7.	Pensacola	1994	N/R	1 : 24000
8.	Pensacola	2012	N/R	1 : 24000
9.	Pensacola	2015	N/R	1 : 24000
10.	Pensacola	2018	N/R	1 : 24000

The USGS 7.5 minute series includes scales 1:24,000 / 1:25,000 / 1:31,680. The USGS 15 minute series includes scales 1:48,000 / 1:62,500 / 1:63,360. The USGS 30x60 minute series scale is 1:100,000.

HIG Research Summary

Site Location
Baptist Health Care E Street Campus
1000 W Moreno St
Pensacola, FL

Requested by
Envirosite Corporation
2 Corporate Drive, Suite 450
Shelton, CT

HIG Project #
2065993
Client Project #
75154
Date Created
07/15/2022

Historical Information Gatherers

This Research Summary identifies the products and services provided by Historical Information Gatherers, Inc. (HIG) for the above referenced site location. All products are provided as PDFs unless otherwise noted.

City Directory Pages/Abstracts

Research Methodology: A search was conducted for city directories that include coverage of the site area using HIG's City Directory Collection and other sources, if needed. Directories for the following years were identified for the site area. A comma between date ranges indicates a gap of 10 years or more in available city directories:

Pensacola: (1905-2018)

The above listed directories were reviewed at approximate 5 year intervals to determine if the street(s) specified in the order were included in the directories and had listings for the site area. HIG attempted to identify former street names and aliases and if identified, these were also included in the review.

Research Results: City directory information, when provided, was used to create a multi-page file(s) named CD- followed by the street name. When City Directory Pages are provided, the publication name and date are shown at the top of each page. When a City Directory abstract is provided, the first page of the abstract includes the relevant publication information. The years of coverage identified for each street and any identified historical street names are as follows:

West Avery Street: (1964-2018)
West Blount Street: (1964-2018)
North E Street: (1964-2018)
North F Street: (1964-1989)
North J Street: (1964-2018)
West Lakeview Avenue: (1964-2018)
West Mallory Street: (1921-1934, 1964-2018)
West Moreno Street: (1964-2018)

FIM+ Maps

The HIG Historical Map Collection and the United States Library of Congress Map Collection were searched for fire insurance maps (FIMs), real estate atlases and similar maps for the site location and adjoining properties. These maps were used to create a multi-page file named FIM+Maps. The maps have title blocks that include the map publisher, year the map was created and, if applicable, the year the map was last updated. The years provided are:

1950, 1979

Disclaimer & Limitation of Liability

This Research Summary and the related documents and images provided by Historical Information Gatherers (hereafter referred to as the “Site Specific HIG Data”) contain information obtained from a variety of public and private sources. Additional information for the site and surrounding properties may exist. Accordingly, there can be no guaranty or warranty that the information provided is complete for its particular intended purpose. No warranty expressed or implied, is made whatsoever in connection with the Site Specific HIG Data. Historical Information Gatherers specifically disclaims the making of any such warranties, including without limitation, merchantability or fitness for a particular purpose. Historical Information Gatherers, its officers, employees and independent contractors cannot be held liable to anyone for any loss or damage, whether arising out of errors or omissions, negligence, accident or any other cause, resulting directly or indirectly from any information provided or any information not provided in the Site Specific HIG Data. Any liability on the part of Historical Information Gatherers is strictly limited to a refund equal to the amount paid for the Site Specific HIG Data.

Tank Information

Tank ID :	1R1
Gallons :	10000
Tank Location :	ABOVEGROUND
Substance :	Aviation Gas
Install Date :	2009-10-01
Status :	In Service
Status Date :	2009-10-01
Construction Items :	Overfill/Spill - Level gauges/alarms Primary Construction - Steel Secondary Containment - AST containment Secondary Containment - Double wall
Monitoring Items :	External Tk Monitoring - Visual inspection of ASTs Internal Tk Monitoring - Monitor dbl wall tank space Miscellaneous - Visual inspect pipe sumps Miscellaneous - Visual inspect dispenser liners Piping Monitoring - Monitor dbl wall pipe space
Piping Items :	Corrosion Protection - External protective coating Miscellaneous Attributes - Pressurized piping system

Primary Construction - Fiberglass
Secondary Containment - Double wall

Tank Information
Tank ID : 6
Gallons : 1400
Tank Location : ABOVEGROUND
Substance : Emerg Generator Diesel
Install Date : 1995-01-01
Status : In Service
Status Date : 2000-07-05

Construction Items :
Overfill/Spill - Level gauges/alarms
Overfill/Spill - Spill containment bucket
Primary Construction - Steel
Secondary Containment - AST containment
Secondary Containment - Double wall

Monitoring Items :
External Tk Monitoring - Visual inspection of ASTs
Internal Tk Monitoring - Monitor dbl wall tank space

Piping Items :
Miscellaneous Attributes - Suction piping system
Miscellaneous Attributes - Abv, no soil contact
Primary Construction - Steel/galvanized metal

Tank Information
Tank ID : 7
Gallons : 20000
Tank Location : ABOVEGROUND
Substance : Emerg Generator Diesel
Install Date : 2011-01-01
Status : In Service
Status Date : 2011-01-01

Construction Items :
Overfill/Spill - Ball check valve
Overfill/Spill - Tight fill
Overfill/Spill - Spill containment bucket
Overfill/Spill - Level gauges/alarms
Primary Construction - Steel
Secondary Containment - Double wall

Monitoring Items :
External Tk Monitoring - Visual inspection of ASTs

Description/History :

Mr. Kevin Marchetti, owner and operation of the Renaissance Man, operates a design metal fabrication company on site, and is under contract to purchase the property from Mr. Brown. The property has a history of soil and ground water contamination from previous metal fabrication and painting operations conducted by Mr. Brown. Mr. Marchetti entered the program to obtain ESA financial assistance in order to satisfy AAI Due Diligence Prospective Purchaser obligations. The Phase I ESA identified REC and Phase II ESA was subsequently conducted. The Phase II sampling identified levels of Cadmium slightly above the 5ppb level GCTLs. Supplemental sampling was conducted and verified that the Cadmium level was below detection limits at 4.5 ppb. The consultant recommended no further investigation was needed and all ESA operations have been completed. Mr. Marchetti is expected to complete the purchase of the property. He plans to expand the building and has indicated that he will be hiring one or two new employees in the near future. The Phase I ESA was paid for with EPA Brownfields Pilot Grant funding. The Phase II ESA and Supplemental Sampling was paid for with CDBG funding. (PPF-10/31/06)

PFAS UCMR3: List of PWS wells sampled for Unregulated Contaminant Monitoring Rule (UCMR)

Agency Version Date: 06/02/2022
Agency Update Frequency: Quarterly
Planned Next Contact: 08/29/2022
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 06/02/2022

OTHER ASCERTAINABLE RECORDS (cont.)

CATTLE DIPPING VATS - FL: Cattle Dipping Vats from the Ground Water Inspection Facility listing.

Agency Version Date: 07/05/2022
Agency Update Frequency: Quarterly
Planned Next Contact: 09/29/2022
Agency: Florida Department of Environmental Protection
Agency Contact: 850-245-8927
Most Recent Contact: 07/05/2022

COAL ASH - FL: Coal Ash Disposal Site Listing

Agency Version Date: 05/30/2022
Agency Update Frequency: Quarterly
Planned Next Contact: 08/24/2022
Agency: Florida Department of Environmental Protection
Agency Contact: 850.245.8712
Most Recent Contact: 05/30/2022

DRYCLEANERS - FL: Drycleaner facility listing

Agency Version Date: 06/17/2022
Agency Update Frequency: Varies
Planned Next Contact: 09/13/2022
Agency: Florida Department of Environmental Protection
Agency Contact: 850-245-8927
Most Recent Contact: 06/17/2022

GWCA - FL: Ground water contaminated areas

Agency Version Date: 05/06/2022
Agency Update Frequency: Varies
Planned Next Contact: 08/02/2022
Agency: Florida Department of Environmental Protection
Agency Contact: 850-245-2118
Most Recent Contact: 05/06/2022

PFAS - FL: List of PFAS sites and areas of interest

Agency Version Date: 05/30/2022
Agency Update Frequency: Quarterly
Planned Next Contact: 08/25/2022
Agency: Florida Department of Environmental Protection
Agency Contact: 850-245-8927
Most Recent Contact: 05/27/2022

PFAS AFFF - FL: List of sites with environmental assessments related to the historic and current use of chemicals found in aqueous film forming foam (AFFF) at fire training facilities.

Agency Version Date: 07/07/2022
Agency Update Frequency: Quarterly
Planned Next Contact: 10/03/2022
Agency: Department of Environmental Protection
Agency Contact: 850-245-2006
Most Recent Contact: 07/07/2022

PRIORITY CLEANERS - FL: Listing of sites included in the Drycleaning Solvent Cleanup Program Priority Ranking List

Agency Version Date: 08/09/2021
Agency Update Frequency: No Longer Maintained
Planned Next Contact: 07/21/2022
Agency: Department of Environmental Protection
Agency Contact: N/R
Most Recent Contact: 04/25/2022

SIS - FL: Listing of site investigation section sites

Agency Version Date: 08/10/2021
Agency Update Frequency: Varies
Planned Next Contact: 07/25/2022
Agency: Florida Department of Environmental Protection

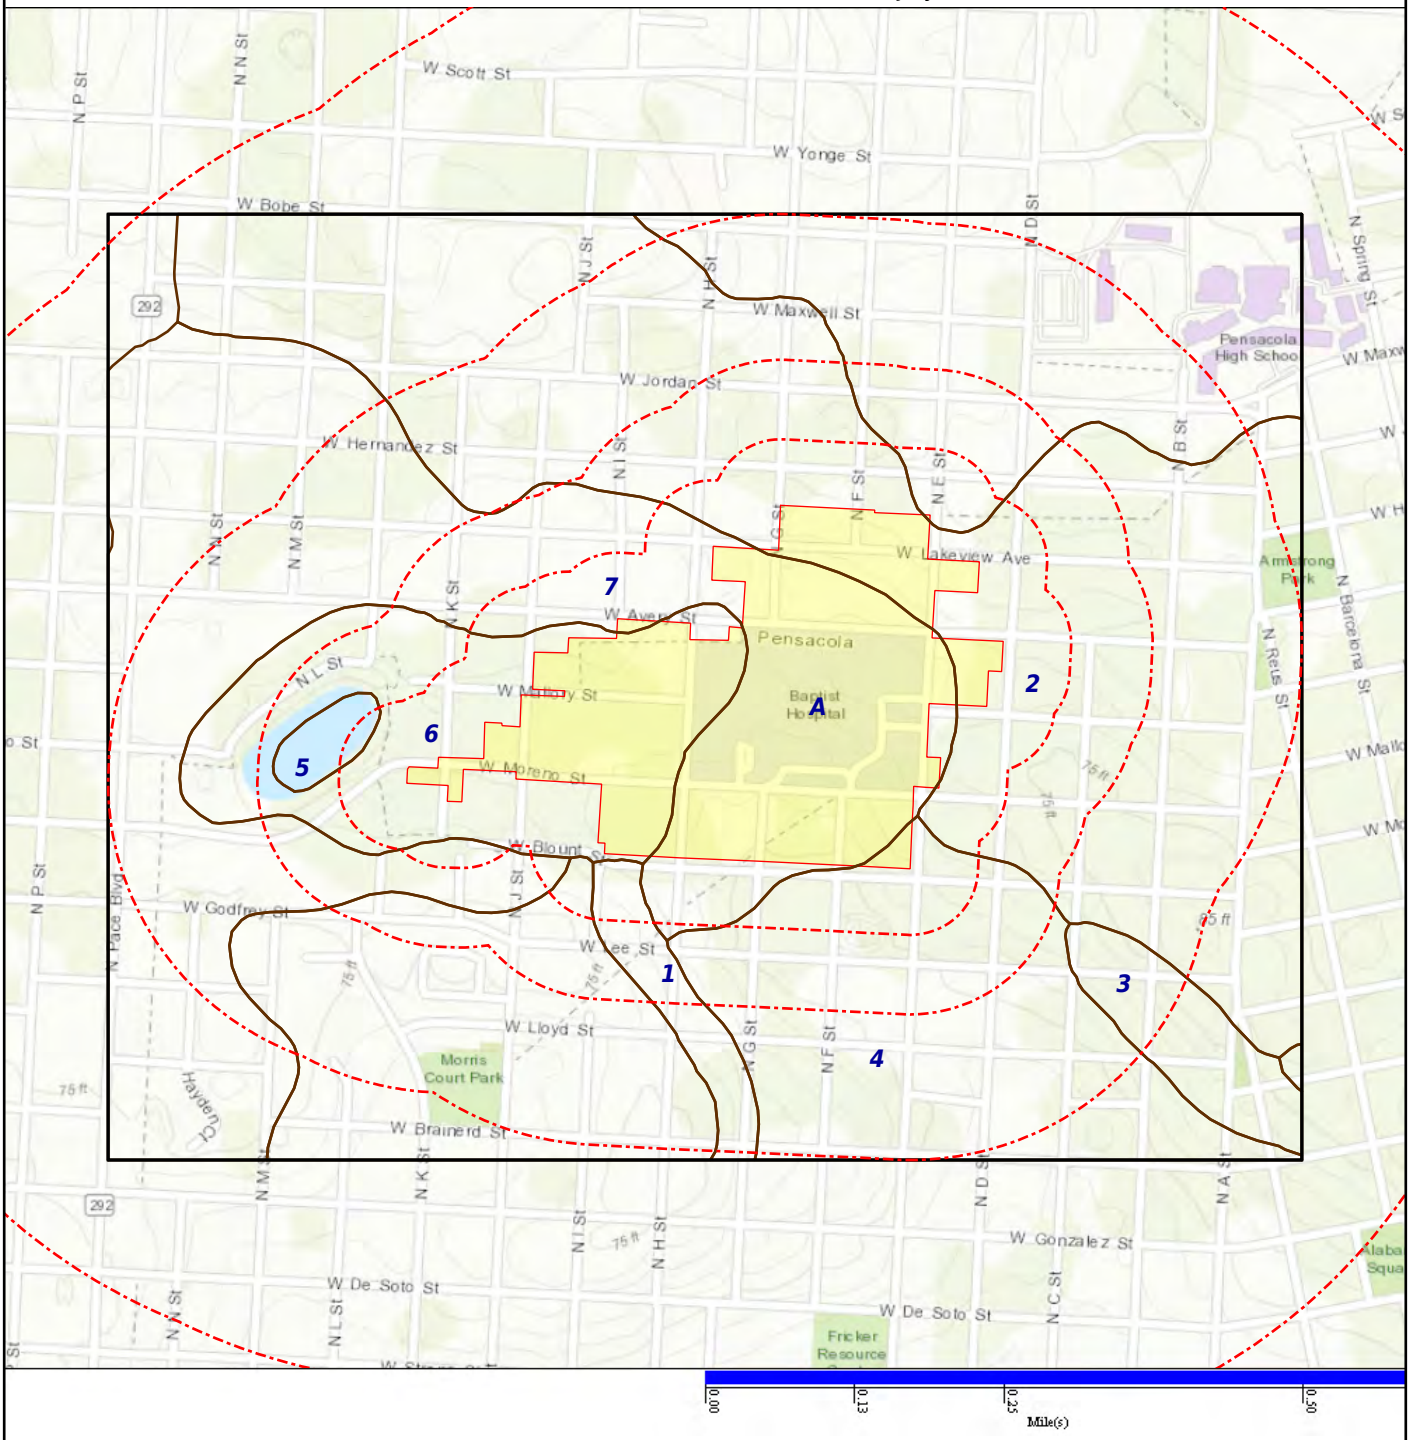
REPORT DATE: July 14, 2022



SOIL COMPOSITION IN GENERAL AREA OF SUBJECT PROPERTY:

Agency source: Soil Conservation Service, US Department of Agriculture

SOIL MAP ID 1	SSURGO
USDA Soil Name	Lakeland,Series
USDA Soil Texture	Sand
Hydrologic Soil Group	A
Soil Drainage Class	Excessively drained
Hydric Classification	0
Corrosion Potential - Uncoated Steel	Low

Layer	Depth (inches)	Soil Texture	AASHTO Group	Unified Soil Description	Saturated Hydraulic Conductivity micro m/sec	Soil Reaction pH
1	0-15	Sand	Reference: This is a classification of soil material for highway and airfield construction (Procedure M 145-73 in Am. Assoc. of State Highway and Transportation Officials, 1984.	Reference: This is a classification of soil material designed for general construction purposes. It is dependent on the particle size distribution of the <75 mm, the liquid limit, and the plasticity index and on whether the soil material is high in organic matter (ASTM test D 2487, in ASTM, 1984).	42-141	5.1-6
2	15-203	Sand	Granular materials (35% or less passing No. 200), fine sand. Reference: This is a classification of soil material for highway and airfield construction (Procedure M 145-73 in Am. Assoc. of State Highway and Transportation Officials, 1984.	Reference: This is a classification of soil material designed for general construction purposes. It is dependent on the particle size distribution of the <75 mm, the liquid limit, and the plasticity index and on whether the soil material is high in organic matter (ASTM test D 2487, in ASTM, 1984).	42-141	5.1-6

SOIL MAP ID 2	SSURGO
USDA Soil Name	Troup,Series
USDA Soil Texture	Sand
Hydrologic Soil Group	A
Soil Drainage Class	Somewhat excessively drained
Hydric Classification	0
Corrosion Potential - Uncoated Steel	Moderate

Layer	Depth (inches)	Soil Texture	AASHTO Group	Unified Soil Description	Saturated Hydraulic Conductivity micro m/sec	Soil Reaction pH
1	0-15	Sand	Reference: This is a classification of soil material for highway and airfield construction (Procedure M 145-73 in Am. Assoc. of State Highway and Transportation Officials, 1984.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand. Reference: This is a classification of soil material designed for general construction purposes. It is dependent on the particle size distribution of the <75 mm, the liquid limit, and the plasticity index and on whether the soil material is high in organic matter (ASTM test D 2487, in ASTM, 1984).	42-141	4.5-6
2	15-117	Sand	Reference: This is a classification of soil material for highway and airfield construction (Procedure M 145-73 in Am. Assoc. of State Highway and Transportation Officials, 1984.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand. Reference: This is a classification of soil material designed for general construction purposes. It is dependent on the particle size distribution of the <75 mm, the liquid limit, and the plasticity index and on whether the soil material is high in organic matter (ASTM test D 2487, in ASTM, 1984).	42-141	4.5-6
3	117-203	Sandy clay loam	Silt-Clay materials (more than 35% passing No. 200) clayey soils. Reference: This is a classification of soil material for highway and airfield construction (Procedure M 145-73 in Am. Assoc. of State Highway and Transportation Officials, 1984.	COARSE-GRAINED SOILS, Sands, sands with fines, Clayey Sand. Reference: This is a classification of soil material designed for general construction purposes. It is dependent on the particle size distribution of the <75 mm, the liquid limit, and the plasticity index and on whether the soil material is high in organic matter (ASTM test D 2487, in ASTM, 1984).	4-14	4.5-5.5

SOIL MAP ID 3	SSURGO
USDA Soil Name	Lakeland,Series
USDA Soil Texture	Sand
Hydrologic Soil Group	A
Soil Drainage Class	Excessively drained
Hydric Classification	0
Corrosion Potential - Uncoated Steel	Low

Layer	Depth (inches)	Soil Texture	AASHTO Group	Unified Soil Description	Saturated Hydraulic Conductivity micro m/sec	Soil Reaction pH

PWS

Facility Address :	1000 W. MORENO STREET, PENSACOLA, FL 32502
PWS ID :	FL1170046
PWS Type :	Transient non-community system
PWS Name :	BAPTIST GENERAL HOSPITAL
Activity Status :	Inactive
Primary Source :	Ground water
Submission Year :	2022
Submission Year Quarter :	2022Q1
Population Served Count :	476
Service Connections Count :	2
Population Category 2 :	<10,000
Population Category 3 :	<=3300
Population Category 4 :	<10K
Population Category 5 :	<=500
Population Category 11 :	101-500
Submission Quarter :	1
Submission Status Code :	Y
First Reported Date :	1979-02-10
Last Reported Date :	1995-07-22
Deactivation Date :	1981-04-01
GW or SW :	Groundwater
Is Grant Eligible :	N
Is Outstanding Performer :	N/R
Is School or Daycare :	N
Is Source Water Protected :	N/R
Primacy Agency :	Florida
Primacy Type :	State
Org Name :	N/R
EPA Region :	Region 4
Admin Name :	BAPTIST GENERAL HOSPITAL
Owner Type :	Local government

HYDROLOGIC UNIT
Hydrologic Unit Maps
USGS
The United States Geological Survey created a hierarchical system of hydrologic units originally called regions, sub-regions, accounting units, and cataloging units. Each unit was assigned a unique Hydrologic Unit Code (HUC). As first implemented the system had 21 regions, 221 subregions, 378 accounting units, and 2,264 cataloging units. Over time the system was changed and expanded. As of 2010 there are six levels in the hierarchy, represented by hydrologic unit codes from 2 to 12 digits long, called regions, subregions, basins, subbasins, watersheds, and subwatersheds. The table below describes the system's hydrologic unit levels and their characteristics, along with example names and codes.

FLOOD DFIRM
National Flood Hazard Layer Database
Federal Emergency Management Agency
The National Flood Hazard Layer Database (NFHL) is a computer database that contains the flood hazard map information from FEMAs Flood Map Modernization program. These map data are from Digital Flood Insurance Rate Map (DFIRM) databases and Letters of Map Revision.

APPENDIX C

Professional Qualifications

Qualifications of Professionals

Matthew Allen, Environmental Scientist Level I

Mr. Allen graduated from the University of West Florida where he completed studies in biology, chemistry, geography, and hydrology. Mr. Allen supports Cameron-Cole's Real Estate Support Services group by conducting Phase I Environmental Site Assessments (ESAs) in accordance with ASTM International Standard E1527-21 and 40 CFR 312, All Appropriate Inquiry. He has experience in conducting various elements of site assessment including monitoring well installation, soil borings, and the collection of soil and groundwater samples for laboratory analysis. His project management responsibilities include assisting with development of proposals, project scheduling, regulatory agency notification, client coordination and preparing technical reports for submittal to regulatory agencies.

Education:	M.S. Environment Science/Management, University of West Florida, Pensacola, Florida, May 2022.
	B.S. in Environment Science/Management, University of West Florida, Pensacola, Florida, May 2019.
Certifications:	40-hour Hazardous Waste Operations and Emergency Response Training

John H. Bondurant, Senior Director/Regional Manager

Mr. Bondurant serves as Senior Director and Regional Manager of Cameron-Cole and has more than 30 years of professional experience as an environmental consultant. As a Regional Manager he is responsible for directing and managing teams of environmental professionals which execute a diverse portfolio of environmental permitting, assessment, and remediation projects. Mr. Bondurant has broad experience with brownfields redevelopment, environmental compliance, permitting, and risk management consulting. Mr. Bondurant also currently serves as a Principal Level Environmental Professional overseeing Cameron-Cole's National Real Estate Support Services practice which provides environmental due diligence, risk management, and property transfer support services to clients throughout the United States. He has extensive experience in performance of Phase I and Phase II Environmental Site Assessments in accordance with ASTM International Standards and 40 CFR 312 All Appropriate Inquiry. He has conducted or supervised subsurface investigations at hundreds of contaminated properties throughout the country with an emphasis in Florida. He also has extensive experience with redevelopment of environmentally impaired properties, including management of construction and remediation projects from initial assessment through regulatory closure and site redevelopment.

Education:	B.S. Biology, Spring Hill College
	B.S. Chemistry, University of West Florida
	M.B.A. Finance, University of West Florida

Mr. Mark Faulkner
Baptist Hospital, Inc.
1000 W Moreno St
Pensacola, FL 32501

Subject: **Conditional Site Rehabilitation Completion Order (CSRCO)**
Baptist Hospital
1000 West Moreno Street
Pensacola, Escambia County
FDEP Facility ID# 178626031
OGC Case No. 21-0290
Parcel Identification Number 000S009050001058
Discharge Date: October 19, 2009 (Non-program)
Discharge Score: 64

Dear Mr. Faulkner:

The Petroleum Restoration Program of the Florida Department of Environmental Protection (DEP or Department) has reviewed the Supplemental Site Assessment Report that includes a Conditional No Further Action (NFA) Proposal (Conditional NFA Proposal), dated May 2, 2017, for Baptist Hospital, for the petroleum discharge. Maps showing the location of Baptist Hospital and the location of the "contaminated site" (i.e., contaminant plume) for which this Order is being issued are attached as Exhibits 1 and 2 and are incorporated by reference herein. Failure to comply with the provisions of this Order is a violation of section 376.302, Florida Statutes (F.S.). The contaminated site includes the following parcels or parts of parcels: 1000 W Moreno St., Pensacola, Florida 32501, Parcel ID 000S009050001058.

The contamination, which resulted from a discharge that was discovered on October 19, 2009, consisted of petroleum and petroleum products. The discharge resulted from a leak in the fuel piping associated with underground storage tanks. The Conditional NFA Proposal is supported by earlier submittals, prepared pursuant to the requirements of Chapter 62-780, Florida Administrative Code (F.A.C.), which can be found in DEP document repository, Oculus at https://depedms.dep.state.fl.us/Oculus/servlet/hitlist?action=sort

Based on the documentation submitted with the Conditional NFA Proposal and other documents, DEP has reasonable assurance that the criteria in Chapter 62-780, have been met, including the commitments set forth in the technical submittals with respect to the establishment and use and recordation of institutional controls. The documents attached as Exhibit 4 for contaminants remaining at the contaminated site, in conjunction with appropriate institutional controls, detail the controls and conditions for the contaminated site. Contaminants remaining at the contaminated site are limited to groundwater. Therefore, you have satisfied the site rehabilitation requirements for the contaminated site and are released from any further obligation to conduct site rehabilitation at the contaminated site, except as set forth below. See attached table (Exhibit 3), incorporated by reference herein, which includes information regarding the contaminants; affected media; and applicable cleanup target levels established for the contaminated site that is the subject of this Order.

The following, including this Order, establish the institutional controls for the contaminated site and any change to the risk of exposure to any contamination or destabilization of any groundwater contamination that results from either failing to comply with the institutional controls or any change, amendment, revocation, or repeal of the institutional controls will result in the revocation of this Order.

Declaration of Restrictive Covenant (DRC). A DRC was recorded by Baptist Hospital, Inc., on January 10, 2022, in Official Record Book/Instrument# 8704, Page 939, Public Records of Escambia County, Florida, and is attached and incorporated by reference as Exhibit 4. Any current or future real property owner of the contaminated site must comply with the provisions contained within the DRC, (attached) recorded or otherwise established prior to the execution of this Order.

Dewatering. DEP will rely on Rule 62-621.300, F.A.C., and the guidance incorporated therein to ensure that no exposure to contaminated groundwater resulting in risk to human health, public safety or the environment will occur due to dewatering activities on the contaminated site. DEP Rule 62-621.300, F.A.C., requires a permit when conducting dewatering in the area of a contaminated site. Any person intending to conduct dewatering within the contaminated site must submit to DEP DWM a dewatering plan signed and sealed by a Florida-registered professional engineer or Florida-registered professional geologist that ensures the appropriate handling, treatment, and disposal of any extracted groundwater that may be contaminated to avoid adversely impacting or increasing the potential for exposure to contaminants resulting in risk to human health, public safety or the environment. The plan must include the location(s) of the dewatering activity and the effluent disposal area(s) relative to known areas of groundwater contamination, proposed flow rate, duration, volume, estimated drawdown, (based upon design calculations), a technical evaluation demonstrating that the dewatering will not cause the migration of contamination and procedures for proper characterization, treatment, handling and disposal of any contaminated groundwater that may be encountered during dewatering. DEP DWM will keep the plan in the site file as

documentation of site conditions and will rely on this professional certification for demonstrating compliance with this restriction. The PRSR is advised that other federal, state, or local laws and regulations may apply to this activity. A copy of all permits obtained for the implementation of dewatering must be provided along with the plan submitted to FDEP's DWM. Unless it is demonstrated that the cleanup criteria under Subsection 62-780.680(1), F.A.C., have been achieved, DEP, in addition to other remedies available at law, may institute proceedings to revoke this Order and require the resumption of site rehabilitation activities if any dewatering activities are commenced without submittal of such a plan. See attached and incorporated by reference Exhibit 4.

Stormwater features. DEP will rely on a plan signed and sealed by a Florida-registered professional engineer or Florida-registered professional geologist to construct new or modify existing stormwater features to ensure that there is no exposure to contaminated groundwater entering into new or expanded stormwater features resulting in risk to human health, public safety or the environment due to the contaminated site. The plan must include the feature location, construction and design specifications relative to known areas of soil and groundwater contamination, and a technical evaluation (including calculations, fate and transport modeling, as applicable) to demonstrate that the new stormwater facilities will not cause the migration of contamination. The plan shall also outline the procedures for proper characterization, handling and disposal of any contaminated media that may be encountered during construction. DEP DWM will keep the plan in the site file as documentation of site conditions and will rely on this professional certification for demonstrating compliance with this restriction. The PRSR is advised that other federal, state, or local laws and regulations may apply to this activity. A copy of all permits obtained for the implementation of dewatering must be provided along with the plan submitted to FDEP's DWM. Construction of stormwater swales, stormwater detention or retention features, or ditches on the contaminated site subject to these restrictions could destabilize the groundwater plume or increase potential for exposure to contaminants resulting in risk to human health, public safety, or the environment. For this reason, parties seeking to construct stormwater features on the contaminated site subject to these restrictions must submit the above plan to DEP in addition to obtaining any authorizations that may be required by DEP's Division of Water Resource Management, the Water Management District or other federal, state, or local laws and regulations that may apply to this activity. Unless it is demonstrated that the cleanup criteria under Subsection 62-780.680(1), F.A.C., have been achieved, DEP, in addition to other remedies available at law, may institute proceedings to revoke this Order and require the resumption of site rehabilitation activities if any such stormwater features are constructed or commenced without submittal of such a plan. See attached and incorporated by reference Exhibit 4.

Removal of controls. Where the institutional control is a restrictive covenant, if the current or future real property owner of the contaminated site proposes to remove it, the real property owner shall obtain prior written approval from DEP. For all types of

institutional controls, the removal of the controls shall be accompanied by the immediate resumption of site rehabilitation or implementation of other approved controls, unless it is demonstrated to DEP that the criteria of Subsection 62-780.680(1), F.A.C., are met.

Well abandonment. Within 60 days of receipt of this Order, Baptist Hospital, Inc., is required to properly plug and abandon all monitoring wells, injection wells, extraction wells and sparge wells unless these wells are otherwise required for compliance with a local ordinance, a DEP rule or another cleanup. The wells must be plugged and abandoned in accordance with the requirements of Subsection 62-532.500(5), F.A.C. A Well Plugging Report shall be submitted to DEP within 30 days of well plugging.

Future owners and users of the contaminated site should be made aware of the existence and contents of this Order. Additionally, information about the contaminated site will be maintained on the Institutional Controls Registry at https://floridadep.gov/waste/waste/content/institutional-controls-registry-guidance

Further, in accordance with Section 376.30701(4), F.S., upon completion of site rehabilitation, additional site rehabilitation is not required unless it is demonstrated that:

(a) Fraud was committed in demonstrating site conditions or completion of site rehabilitation;

(b) New information confirms the existence of an area of previously unknown contamination which exceeds the site-specific rehabilitation levels established in accordance with Section 376.30701(2), F.S., or which otherwise poses the threat of real and substantial harm to public health, safety, or the environment;

(c) The remediation efforts failed to achieve the site rehabilitation criteria established under this section;

(d) The level of risk is increased beyond the acceptable risk established under Section 376.30701(2), F.S., due to substantial changes in exposure conditions, such as a change in land use from nonresidential to residential use. Any person who changes the land use of the site, thereby causing the level of risk to increase beyond the acceptable risk level, may be required by DEP to undertake additional remediation measures to ensure that human health, public safety, and the environment are protected consistent with Section 376.30701, F.S.; or

(e) A new discharge of pollutants or hazardous substances occurs at the site subsequent to the issuance of this Order.

NOTICE OF RIGHTS

This action is final and effective on the date filed with the Clerk of the Department unless a petition for an administrative hearing is timely filed under Sections 120.569 and 120.57, F.S., before the deadline for filing a petition. On the filing of a timely and sufficient petition, this action will not be final and effective until a subsequent order of the Department. Because the administrative hearing process is designed to formulate final agency action, the subsequent order may modify or take a different position than this action.

Petition for Administrative Hearing

A person whose substantial interests are affected by the Department's action may petition for an administrative proceeding (hearing) under Sections 120.569 and 120.57, F.S. Pursuant to Rules 28-106.201 and 28-106.301, F.A.C., a petition for an administrative hearing must contain the following information:

(a) The name and address of each agency affected and each agency's file or identification number, if known;
(b) The name, address, any e-mail address, any facsimile number, and telephone number of the petitioner, if the petitioner is not represented by an attorney or a qualified representative; the name, address, and telephone number of the petitioner's representative, if any, which shall be the address for service purposes during the course of the proceeding; and an explanation of how the petitioner's substantial interests will be affected by the agency determination;
(c) A statement of when and how the petitioner received notice of the agency decision;
(d) A statement of all disputed issues of material fact. If there are none, the petition must so indicate;
(e) A concise statement of the ultimate facts alleged, including the specific facts that the petitioner contends warrant reversal or modification of the agency's proposed action;
(f) A statement of the specific rules or statutes that the petitioner contends require reversal or modification of the agency's proposed action, including an explanation of how the alleged facts relate to the specific rules or statutes; and
(g) A statement of the relief sought by the petitioner, stating precisely the action that the petitioner wishes the agency to take with respect to the agency's proposed action.

The petition must be filed (received by the Clerk) in the Office of General Counsel of the Department at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida 32399-3000, or via electronic correspondence at Agency_Clerk@FloridaDEP.gov. Also, a copy of the petition shall be mailed to the addressee of this order at the address indicated above at the time of filing.

Time Period for Filing a Petition

In accordance with Rule 62-110.106(3), F.A.C., petitions for an administrative hearing by the addressee of this order must be filed within **21** days of receipt of this written notice. Petitions filed by any persons other than the addressee of this order must be filed within **21** days of publication of the notice or within **21** days of receipt of the written notice, whichever occurs first.

The failure to file a petition within the appropriate time period shall constitute a waiver of that person's right to request an administrative determination (hearing) under Sections 120.569 and 120.57, F.S., or to intervene in this proceeding and participate as a party to it. Any subsequent intervention (in a proceeding initiated by another party) will be only at the discretion of the presiding officer upon the filing of a motion in compliance with Rule 28-106.205, F.A.C. If you do not publish notice of this action, this waiver may not apply to persons who have not received a clear point of entry.

Extension of Time

Under Rule 62-110.106(4), F.A.C., a person whose substantial interests are affected by the Department's action may also request an extension of time to file a petition for an administrative hearing. The Department may, for good cause shown, grant the request for an extension of time. Requests for extension of time must be filed with the Office of General Counsel of the Department at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida 32399-3000, or via electronic correspondence at Agency_Clerk@FloridaDEP.gov, before the deadline for filing a petition for an administrative hearing. A timely request for extension of time shall toll the running of the time period for filing a petition until the request is acted upon.

Mediation

Mediation is not available in this proceeding.

Judicial Review

Once this decision becomes final, any party to this action has the right to seek judicial review pursuant to Section 120.68, F.S., by filing a Notice of Appeal pursuant to Florida Rules of Appellate Procedure 9.110 and 9.190 with the Clerk of the Department in the Office of General Counsel (Station #35, 3900 Commonwealth Boulevard, Tallahassee, Florida 32399-3000) and by filing a copy of the Notice of Appeal accompanied by the applicable filing fees with the appropriate district court of appeal. The notice must be filed within 30 days from the date this action is filed with the Clerk of the Department.

Questions

Any questions regarding DEP's review of your Conditional NFA Proposal should be directed to Robert Jake Gallman at 850-595-6700 extension 2056 or Robert.gallman@flhealth.gov. Questions regarding legal issues should be referred to DEP Office of General Counsel at 850-245-2242. Contact with any of the above does not constitute a petition for administrative hearing or request for an extension of time to file a petition for administrative hearing.

MEMORANDUM

FROM: **Natasha Lampkin, Program Administrator, Petroleum Restoration Program** Natasha Lampkin Digitally signed by Natasha Lampkin Date: 2022.05.17 14:32:36 -04'00'

SUBJECT: **Delegations of Authority**

DATE: **5/17/2022**

In accordance with DEP Directive 100, the following referenced delegation(s) are hereby delegated to the delegate(s) listed.

Delegation Reference	Delegate(s)
DEL-16 Permitting Authority: For their respective divisions, take agency action on all orders, certifications, agreements, permits, general permits, generic permits, exemptions, and exception applications, including modifications and extensions.	• Kenneth Busen, Environmental Administrator, Petroleum Restoration Program

Limitations to the delegation(s): Limited to the following Approvals for Petroleum Cleanup Sites: Site Rehabilitation Completion Orders, Conditional Site Rehabilitation Completion Orders, Low Scored Site Initiative No Further Action Orders, Underground Injection Control Approval Orders, Remedial Action Plan Approval Orders, Interim Source Removal Proposal Approval Order and Monitoring Plan Approvals only and does not include any other agreements, orders, certifications, permits, exemptions, exceptions, modifications or extensions.

The exercise of these delegations shall be consistent with all applicable rules, statutes, administrative directives, policies and procedures. These delegations should be exercised with a high degree of judgment and caution. If there is any doubt whether exercising this delegated authority is inconsistent with any of the above limitations, the person whom the authority is delegated shall not exercise the authority without first consulting Natasha Lampkin, Program Administrator, Petroleum Restoration Program.

This delegation of authority revokes, replaces, and supersedes all previous delegations within the Petroleum Restoration Program.

This delegation is temporary and will be in effect from June 1, 2022 through June 3, 2022 and June 7, 2022.

DECLARATION OF RESTRICTIVE COVENANT

THIS DECLARATION OF RESTRICTIVE COVENANT (hereinafter "Declaration") is made this 10th day of January, 2022 by Baptist Hospital, Inc., a Florida Not for Profit Corporation (hereinafter "GRANTOR"), and the Florida Department of Environmental Protection (hereinafter "FDEP"). This Declaration is neither extinguished nor affected by the Marketable Record Title Act pursuant to section 712.03, Florida Statutes (F.S.).

RECITALS

A. GRANTOR is the fee simple owner of that certain real property situated in the County of Escambia, State of Florida, more particularly described in Exhibit "A" attached hereto and made a part hereof (the "Property"). The portion of the Property that is being restricted by this Declaration is more particularly described in Exhibit "B" attached hereto and made a part hereof (hereinafter the "Restricted Property").

B The FDEP Facility Identification Number is 178626031. The facility name at the time of this Declaration is Baptist Hospital, 1000 West Moreno Street, Pensacola, Escambia County, Florida. This Declaration addresses the discharge or contamination that was reported to the FDEP on October 19, 2009.

C. Petroleum staining was observed at the Restricted Property during closure of two 10,000 gallon underground storage tanks ("USTs"), which prompted submission of a Discharge Report Form on March 1, 2010, and closure in place of the USTs. Closure assessment activities revealed contaminated soil and pea gravel backfill, which was removed from the Restricted Property during the UST closure. Subsequent assessments revealed groundwater contamination that has been remediated through the operation of a groundwater extraction system beginning on October 18, 2012. The discharge of petroleum, UST closure, assessments, and remediation actions on the Restricted Property are documented in the following reports that are incorporated by reference:

1. Site Assessment Report dated March 24, 2010, submitted by Enviro Pro Tech;
2. Remedial Action Plan dated April 19, 2012, submitted by Enviro Pro Tech;
3. Supplemental Site Assessment Report dated January 13, 2016, submitted by Enviro Pro Tech;

4. Supplemental Site Assessment Report dated May 2, 2017, submitted by Enviro Pro Tech;

5. Confirmatory Soil Sampling & Analysis Letter Report dated April 25, 2019, submitted by Cameron-Cole, LLC;

6. Addendum to April 25, 2019 Confirmatory Soil Sampling & Analysis Letter Report dated June 25, 2019, submitted by Cameron-Cole, LLC.

D. The reports noted in Recital C set forth the nature and extent of the contamination that is located on the Restricted Property. These reports confirm that contaminated groundwater as defined by Chapter 62-780, Florida Administrative Code (F.A.C.), exists on the Restricted Property. Also, these reports document that the extent of the groundwater contamination does not extend beyond the Restricted Property boundary, that the extent of the groundwater contamination does not exceed 1/4 acre, and that the groundwater contamination is not migrating.

E. It is GRANTOR's and FDEP's intent that the restrictions in this Declaration reduce or eliminate the risk of exposure of users or occupants of the Restricted Property and the environment to the contaminants and to reduce or eliminate the threat of migration of the contaminants.

F. FDEP has agreed to issue a Conditional Site Rehabilitation Completion Order (hereinafter "Order") upon recordation of this Declaration. FDEP can unilaterally revoke the Order if the conditions of this Declaration or of the Order are not met. Additionally, if concentrations of petroleum products' chemicals of concern increase above the levels approved in the Order, or if a subsequent discharge occurs at the Restricted Property, FDEP may require site rehabilitation to reduce concentrations of contamination to the levels allowed by the applicable FDEP rules. The Order relating to FDEP Facility ID 178626031 can be found by contacting the Northwest FDEP district office.

G. GRANTOR deems it desirable and in the best interest of all present and future owners of the Restricted Property that an Order be obtained and that the Restricted Property be held subject to certain restrictions, all of which are more particularly hereinafter set forth.

NOW, THEREFORE, to induce FDEP to issue the Order and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged by each of the undersigned parties, GRANTOR agrees as follows:

1. The foregoing recitals are true and correct and are incorporated herein by reference.

2. GRANTOR hereby imposes on the Restricted Property the following restrictions:

a. Groundwater Use. There shall be no use of the groundwater under the Restricted Property. There shall be no drilling for water conducted on the Restricted

Property, nor shall any wells be installed on the Restricted Property other than monitoring or other wells pre-approved in writing by FDEP Division of Waste Management (DWM) in addition to any authorizations required by the FDEP Division of Water Resource Management (DWRM) and the applicable Water Management District (WMD).

b. Dewatering. For any dewatering activities on the Restricted Property, a plan signed and sealed by a Florida-registered professional engineer or Florida-registered professional geologist to address and ensure the appropriate handling, treatment and disposal of any extracted groundwater that may be contaminated must be submitted to FDEP's DWM. The plan must include the location(s) of the dewatering activity and the effluent disposal area(s) relative to known areas of groundwater contamination, proposed flow rates, duration, volume, estimated drawdown, (based upon design calculations), a technical evaluation demonstrating that the dewatering will not cause the migration of contamination and procedures for proper characterization, treatment and handling of any contaminated groundwater that may be encountered during dewatering. FDEP's DWM will keep the plan in the site file as documentation of site conditions and will rely on this professional certification for demonstrating compliance with this restriction. The GRANTOR is advised that other federal, state, or local laws and regulations may apply to this activity. A copy of all permits obtained for the implementation of dewatering must be provided along with the plan submitted to FDEP's DWM. FDEP will rely on this Declaration, Rule 62-621.300, F.A.C., and the guidance incorporated therein, and the signed and sealed dewatering plan as the institutional controls to ensure that no exposure to contaminated groundwater resulting in risk to human health, public safety or the environment will occur due to dewatering activities on the contaminated site. Rule 62-621.300, F.A.C., requires a permit when conducting dewatering in the area of a contaminated site. For this reason, if GRANTOR seeks to conduct dewatering on the Restricted Property, GRANTOR shall submit the signed and sealed plan to FDEP DWM in addition to obtaining any authorizations that may be required by FDEP DWRM, the WMD, or other federal, state, or local laws and regulations that may apply to this activity. The dewatering plan must ensure the appropriate handling, treatment, and disposal of any extracted groundwater that may be contaminated to avoid adversely impacting or increasing the potential for exposure to contaminants resulting in risk to human health, public safety or the environment. Unless it is demonstrated that the cleanup criteria under subsection 62-780.680(1), F.A.C., have been achieved, FDEP, in addition to other remedies available at law, may institute proceedings to revoke this Declaration and the Conditional Site Rehabilitation Completion Order and require the resumption of site rehabilitation activities if any dewatering activities are commenced without submittal of a signed and sealed plan.

c. Stormwater Facilities. There shall be no stormwater swales, stormwater detection or retention facilities, or ditches on the Restricted Property. If stormwater features must be constructed, modified, altered or expanded, a plan signed and

sealed by a Florida-registered professional engineer or a Florida-registered professional geologist must be submitted to FDEP's DWM in addition to any authorizations required by the DWRM and the WMD. The plan must include the feature location, construction and design specifications relative to known areas of soil and groundwater contamination, and a technical evaluation (including calculations, fate and transport modeling, as applicable) to demonstrate that the new stormwater facilities will not cause the migration of contamination. The plan shall also outline the procedures for proper characterization, handling and disposal of any contaminated media that may be encountered during construction. FDEP's DWM will keep the plan in the site file as documentation of site conditions and will rely on this professional certification for demonstrating compliance with this restriction. The GRANTOR is advised that other federal, state, or local laws and regulations may apply to this activity. A copy of all permits obtained for the implementation of dewatering must be provided along with the plan submitted to FDEP's DWM. A revised exhibit must be amended to the Declaration and recorded when any stormwater feature is altered, modified, expanded, or constructed. FDEP will rely on this Declaration and certified plan to construct new or modify existing stormwater features to ensure that there is no exposure to contaminated groundwater entering into new or expanded stormwater features resulting in risk to human health, public safety or the environment due to the contaminated site. Construction of stormwater swales, stormwater detention or retention features, or ditches on the Restricted Property could destabilize the groundwater plume or increase potential for exposure to contaminants resulting in risk to human health, public safety, or the environment. For this reason, if GRANTOR seeks to construct stormwater features on the Restricted Property, GRANTOR shall submit the certified plan to FDEP DWM in addition to obtaining any authorizations that may be required by FDEP DWRM, the WMD, or other federal, state, or local laws and regulations that may apply to this activity. Unless it is demonstrated that the cleanup criteria under subsection 62-780.680(1), F.A.C., have been achieved, FDEP, in addition to other remedies available under law, may institute proceedings to revoke this Declaration and the Conditional Site Rehabilitation Completion Order, and require the resumption of site rehabilitation activities if any such stormwater features are constructed or commenced without submittal of a certified plan.

3. In the remaining paragraphs, all references to "GRANTOR" and "FDEP" shall also mean and refer to their respective successors and assigns.

4. For the purpose of monitoring the restrictions contained herein, FDEP is hereby granted a right of entry upon, over and through, and access to the Restricted Property at reasonable times and with reasonable notice to GRANTOR. Access to the Restricted Property is granted via providing access to the Property located at 1000 W. Moreno St., Pensacola, Florida 32501, and as defined in Exhibit A.

5. It is the intention of GRANTOR that this Declaration shall touch and concern the Restricted Property, run with the land and with the title to the Restricted Property, and shall

apply to and be binding upon and inure to the benefit of GRANTOR and FDEP, and to any and all parties hereafter having any right, title or interest in the Restricted Property or any part thereof. FDEP may enforce the terms and conditions of this Declaration by injunctive relief and other appropriate available legal remedies. Any forbearance on behalf of FDEP to exercise its right in the event of the failure of the GRANTOR to comply with the provisions of this Declaration shall not be deemed or construed to be a waiver of FDEP's rights hereunder. This Declaration shall continue in perpetuity, unless otherwise modified in writing by GRANTOR and FDEP as provided in paragraph 7 below. These restrictions may also be enforced in a court of competent jurisdiction by any other person, firm, corporation, or governmental agency that is substantially benefited by these restrictions. If the GRANTOR does not or will not be able to comply with any or all of the provisions of this Declaration, the GRANTOR shall notify FDEP in writing within three (3) calendar days. Additionally, GRANTOR shall notify FDEP thirty (30) days prior to any conveyance or sale, granting or transferring the Restricted Property or portion thereof, to any heirs, successors, assigns or grantees, including, without limitation, the conveyance of any security interest in said Restricted Property.

6. In order to ensure the perpetual nature of this Declaration, GRANTOR shall reference these restrictions in any subsequent lease or deed of conveyance, including the recording book and page of record of this Declaration. Furthermore, prior to the entry into a landlord-tenant relationship with respect to the Restricted Property, the GRANTOR agrees to notify in writing all proposed tenants of the Restricted Property of the existence and contents of this Declaration of Restrictive Covenant. Without limiting the generality of paragraph 3 above, it is the intention of the parties that if GRANTOR has conveyed the Restricted Property, the GRANTOR's successors and assigns shall be required to perform such notification.

7. This Declaration is binding until a release of covenant is executed by the FDEP Secretary (or designee) and is recorded in the public records of the county in which the land is located. To receive prior approval from the FDEP to remove any requirement herein, cleanup target levels established pursuant to Florida Statutes and FDEP rules must be achieved. This Declaration may be modified in writing only. Any subsequent amendments must be executed by both GRANTOR and FDEP and be recorded by GRANTOR as an amendment hereto.

8. If any provision of this Declaration is held to be invalid by any court of competent jurisdiction, the invalidity of that provision shall not affect the validity of any other provisions of the Declaration. All such other provisions shall continue unimpaired in full force and effect.

9. GRANTOR covenants and represents that on the date of execution of this Declaration that GRANTOR is seized of the Restricted Property in fee simple and has good right to create, establish, and impose this restrictive covenant on the use of the Property.

EXHIBIT "A"

Legal Description of the Property

Beginning at the northwest corner of Fractional Section twenty-seven (27), Township two (2) south, Range thirty (30) west, and run thence south on the west line of said Section a distance of six hundred sixty (660) feet, thence in an easterly direction seven hundred thirty-two (732) feet, thence northward five hundred thirty-eight (538) feet to the north line of the said Section, thence along said north line six hundred forty-two (642) feet to the point of beginning, containing nine (9) acres, more or less, all lying and being in said Section twenty-seven (27), excepting therefrom that portion of the above described parcel that lies west of an extension northward of the west line of "G" Street as shown on the plat of North Hill Highlands recorded in Deed Book 62 at page 244 of the records of said County.

And also all of said right, title, and interest in and to any portions of Blocks 58, 59, 60 and 61 of said North Hill Highlands.

AND ALSO

All that portion of fractional Section 27, Township 2 South, Range 30 West, lying North of the North line of Moreno Street and lying West of an extension Northward of the West line of "G" Street as shown on Plat of North Hill Highlands recorded in Deed Book 62, at Page 244 of the public records of Escambia County, Florida, except property conveyed to Raymond P. Brown by Deed dated May 14, 1927, and recorded in Deed Book 122, at Page 106, of the records of said County, which said excepted parcel is described as beginning at the intersection of the West line of said "G" Street with the North line of Moreno Street (formerly Madison Street) for point-of-beginning, and thence run West along the North line of Moreno Street 150 feet; thence North at the right angles 150 feet; thence East at right angles 150 feet to the West line of an extension Northward of the West line of said "G" Street; and thence run South along the West line of an extension Northward of the West line of the said "G" Street a distance of 150 feet to point-of-beginning.

Said parcels being one and the same as those described in Deed Book 420, at Page 133; Deed Book 254, Page 269, and Deed Book 227, Page 501, all of the public records of Escambia County, Florida.

EXHIBIT "B"

Legal Description and Survey of the Restricted Property

Commence at the Intersection of the north right of way line of Avery Street (55' R/W) and the east right of way line of "H" Street (50' R/W); thence South 85 degrees 43'24" East along said north right of way line for a distance of 224.15 feet; thence South 04 degrees 12'56" West for a distance of 88.97 feet for the point of beginning (Northing 530579.41, Easting 1107535.93, State Plane Coordinates referenced to N.A.D. 83 datum, 2011 adjustment, Florida North Zone).

Thence continue South 04 degrees 12'56" West for a distance of 200.00 feet (Northing 530379.95, Easting 1107521.23); thence South 85 degrees 47'04" East for a distance of 200.00 feet (Northing 530365.25, Easting 1107720.69); thence North 04 degrees 12'56" East for a distance of 200.00 feet (Northing 530564.71, Easting 1107735.39); thence North 85 degrees 47'04" West for a distance of 200.00 feet to the point of beginning.

All lying and being in Sections 18 & 27, Township 2 South, Range 30 West, Escambia County, Florida. Containing 0.92 acres, more or less.

SURVEYOR'S NOTES:

1. Subject to setbacks, easements and restrictions of record.
2. This sketch is subject to any facts that may be disclosed by a full and accurate title search. No title work performed by this firm.
3. This sketch does not reflect or determine ownership.
4. This property may be subject to setback lines mandated by zoning ordinances and\or restrictive covenants of record.
5. Sub-surface improvements, if any, not located.
6. The underground utilities shown have been located from field survey information and existing drawings. The surveyor has not physically located the underground utilities. The surveyor does not certify that the underground utilities shown comprise all such utilities or that they are the exact size, material, or location as indicated.
7. Coordinates shown are State Plane Coordinates referenced to N.A.D. 83 datum, 2011 adjustment, Florida North Zone and expressed in U.S. survey feet.
8. Coordinates are derived by using the Trimble and Florida Department of Transportation continuously operating reference station (CORS) network.
9. NOT A BOUNDARY SURVEY.

Mr. Earl Polk
Baptist Hospital, Inc.
1000 West Moreno Street
Pensacola, FL 32505

Subject: Site Rehabilitation Completion Order
Baptist Hospital
1000 West Moreno Street
Pensacola, Escambia County
FDEP Facility ID# 178626031
Discharge Date: July 7, 2006 (Non-program)

Dear Mr. Polk:

Escambia County Health Department-Environmental Health Division has reviewed the Site Assessment Report (SAR) (and Addendum) and No Further Action Proposal (NFAP) dated January 19, 2007 (received January 22, 2007), prepared and submitted by Enviro-Pro-Tech, Inc. for the petroleum product discharge referenced above. Documentation submitted with the SAR/NFAP confirms that criteria set forth in Subsection 62-770.680(1), Florida Administrative Code (F.A.C.), have been met. Please refer to the attached map of the source property and analytical summary tables. The SAR/NFAP is hereby incorporated by reference in this Site Rehabilitation Completion Order (Order). Therefore, you are released from any further obligation to conduct site rehabilitation at the site for petroleum product contamination associated with the discharge referenced above, except as set forth below.

(1) In the event concentrations of petroleum products' contaminants of concern increase above the levels approved in this Order, or if a subsequent discharge of petroleum or petroleum product occurs at the facility, the Florida Department of Environmental Protection (Department) may require site rehabilitation to reduce concentrations of petroleum products' contaminants of concern to the levels approved in the SAR/NFAP or otherwise allowed by Chapter 62-770, F.A.C.

(2) Additionally, you are required to properly abandon all monitoring wells within 60 days of receipt of this Order. The monitoring wells must be plugged and

abandoned in accordance with the requirements of Subsection 62-532.500(4), F.A.C.

Legal Issues

The Department's Order shall become final unless a timely petition for an administrative hearing is filed under Sections 120.569 and 120.57, Florida Statutes (F.S.), within 21 days of receipt of this Order. The procedures for petitioning for an administrative hearing are set forth below.

Persons affected by this Order have the following options:

(A) If you choose to accept the Department's decision regarding the SAR/NFAP you do not have to do anything. This Order is final and effective as of the date on the top of the first page of this Order.

(B) If you choose to challenge the decision, you may do the following:

(1) File a request for an extension of time to file a petition for an administrative hearing with the Department's Agency Clerk in the Office of General Counsel within 21 days of receipt of this Order; such a request should be made if you wish to meet with the Department in an attempt to informally resolve any disputes without first filing a petition for an administrative hearing; or

(2) File a petition for an administrative hearing with the Department's Agency Clerk in the Office of General Counsel within 21 days of receipt of this Order.

Please be advised that mediation of this decision pursuant to Section 120.573, F.S., is not available.

How to Request an Extension of Time to File a Petition for an Administrative Hearing

For good cause shown, pursuant to Subsection 62-110.106(4), F.A.C., the Department may grant a request for an extension of time to file a petition for an administrative hearing. Such a request must be filed (received) by the Department's Agency Clerk in the Office of General Counsel at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida, 32399-3000, within 21 days of receipt of this Order. Petitioner, if different from Baptist Hospital, Inc., shall mail a copy of the request to Baptist Hospital, Inc. at the time of filing. Timely filing a request for an extension of time tolls the time period within which a petition for an administrative hearing must be made.

How to File a Petition for an Administrative Hearing

A person whose substantial interests are affected by this Order may petition for an administrative hearing under Sections 120.569 and 120.57, F.S. The petition must contain the information set forth below and must be filed (received) by the Department's Agency Clerk in the Office of General Counsel at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida, 32399-3000, within 21 days of receipt of this Order. Petitioner, if different from Baptist Hospital, Inc., shall mail a copy of the petition to Baptist Hospital, Inc. at the time of filing. Failure to file a petition within this time period shall waive the right of anyone who may request an administrative hearing under Sections 120.569 and 120.57, F.S.

Pursuant to Subsection 120.569(2), F.S. and Rule 28-106.201, F.A.C., a petition for an administrative hearing shall contain the following information:

(a) The name, address, and telephone number of each petitioner; the name, address, and telephone number of the petitioner's representative, if any; the facility owner's name and address, if different from the petitioner; the FDEP facility number, and the name and address of the facility;
(b) A statement of when and how each petitioner received notice of the Department's action or proposed action;
(c) An explanation of how each petitioner's substantial interests are or will be affected by the Department's action or proposed action;
(d) A statement of the disputed issues of material fact, or a statement that there are no disputed facts;
(e) A statement of the ultimate facts alleged, including a statement of the specific facts the petitioner contends warrant reversal or modification of the Department's action or proposed action;
(f) A statement of the specific rules or statutes the petitioner contends require reversal or modification of the Department's action or proposed action; and
(g) A statement of the relief sought by the petitioner, stating precisely the action petitioner wishes the Department to take with respect to the Department's action or proposed action.

This Order is final and effective as of the date on the top of the first page of this Order. Timely filing a petition for an administrative hearing postpones the date this Order takes effect until the Department issues either a final order pursuant to an administrative hearing or an Order Responding to Supplemental Information provided to the Department pursuant to meetings with the Department.

Judicial Review

Any party to this Order has the right to seek judicial review of it under Section 120.68, F.S , by filing a notice of appeal under Rule 9.110 of the Florida Rules of

Appellate Procedure with the Department's Agency Clerk in the Office of General Counsel at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida, 32399-3000, and by filing a copy of the notice of appeal accompanied by the applicable filing fees with the appropriate district court of appeal. The notice of appeal must be filed within 30 days after this Order is filed with the Department's clerk (see below).

Questions

Any questions regarding Escambia County Health Department-Environmental Health Division's review of your SAR/NFAP should be directed to Aric J. Porter at (850) 595-6705 ext. 734. Questions regarding legal issues should be referred to the Department's Office of General Counsel at (850) 245-2242. Contact with any of the above does not constitute a petition for an administrative hearing or a request for an extension of time to file a petition for an administrative hearing.

The FDEP Facility Number for this facility is 178626031. Please use this identification on all future correspondence with the Department or Escambia County Health Department-Environmental Health Division.

Sincerely,

Michael E. Ashey, Chief
Bureau of Petroleum Storage Systems

P.G. CERTIFICATION

Site Assessment Report (SAR) (and Addendum) and No Further Action Proposal (NFAP) for Baptist Hospital, located at 1000 West Moreno Street, Pensacola, Escambia County, FDEP Facility ID# 178626031.

I hereby certify that in my professional judgment, the components of this Site Assessment Report (SAR) (and Addendum) and No Further Action Proposal (NFAP) prepared for the July 7, 2006 petroleum product discharge satisfy the requirements set forth in Chapter 62-770, Florida Administrative Code (F.A.C.), and that the conclusions in this report provide reasonable assurances that the objectives stated in Chapter 62-770, F.A.C., have been met.

___ I personally completed this review.

Re: Baptist Hospital
1000 W. Moreno Street
Pensacola, Florida
Fac. ID# 178626031

Dear Ms. Burmeister:

Escambia County Environmental Health Services recommends a No Further Action Order be approved for the above facility. We have performed a thorough review of the Contamination Assessment Report (CAR) submitted by W. Grady Swann, Inc. dated September 30, 1992 which we received on October 2, 1992. Our review determined that the facility meets all requirements for a No Further Action Proposal found in Section 17-770.630(3), Florida Administrative Code (F.A.C.) and all guidelines listed in the Florida Department of Environmental Regulation's document entitled No Further Action and Monitoring Only Guidelines for Petroleum Contaminated Sites.

Below is a summary of the major factors on which our recommendation for approval is based.

1. A limited amount of product was discharged into the permeable soils; the remaining portion of the spill went into a nearby storm drain.

2. IRA activities were initiated immediately after the discharge was discovered and were completed within ten days of the spill.

3. The soil investigation performed at the site determined that no significant amounts of contaminated soils are present at the site.

4. The monitoring well installed into the perched water table did not recharge after purging. Research indicates that the perched water exists only occasionally at the site. No perched water was present during IRA activities.

5. The sandy clay and clayey sand soils at the site are believed to have limited the vertical migration of the spill.

6. This department determined that it would not be cost effective to install a monitoring well into the aquifer that is estimated, based on work done at nearby sites, to exist at approximately 30 ft. below land surface.

7. All sampling and analysis performed by the site's consultant was done under an approved Quality Assurance Plan.

A Contamination Assessment Summary Sheet and a No Further Action Order are included with this letter for your use. If you have any questions or comments, please contact us at (904)444-8990.

Sincerely,

Danny L. Deen

Environmental Health Services

Mr. Don E. Swartz
Baptist Health Care
Post Office Box 17500
Pensacola, Florida 32522-7500

RE: Baptist Hospital
1000 W. Moreno Street
Pensacola, Florida
DER Facility #178626031

Dear Mr. Swartz:

The Bureau of Waste Cleanup has reviewed the Contamination Assessment Report (CAR) and No Further Action Proposal (NFAP) dated September 30, 1992 (received October 2, 1992) submitted for this site. Documentation submitted with the NFAP confirms that criteria set forth in Rule 17-770.630(3), Florida Administrative Code (F.A.C.) have been met. The NFAP is hereby incorporated by reference in this order. Therefore, you are released from any further obligation to conduct site rehabilitation at the site, except as set forth below.

If a subsequent discharge of petroleum or petroleum product occurs at the site, the Department may require site rehabilitation in order to reduce contaminant concentrations to the levels approved through review of the NFAP or otherwise allowed by Chapter 17-770, F.A.C.

Additionally, you are required to properly abandon all monitoring wells except compliance wells required by Chapter 17-761, F.A.C. for release detection. The wells must be abandoned in accordance with the requirements of Rule 17-532.500(4), F.A.C.

Persons whose substantial interests are affected by this Site Rehabilitation Completion Order have a right to challenge the Department's decision. Such a challenge may include filing a petition for an administrative determination (hearing) as described in the following paragraphs. However, pursuant to Chapter 17-103, F.A.C., you may request an extension of time to file the Petition. All requests for extensions of time or petitions for administrative determinations must be filed directly with the Department's Office of General Counsel at the address given below within twenty-one (21) days of receipt of this notice (do not send them to the Bureau of Waste Cleanup).

Recycled Paper

Notwithstanding the above, a person whose substantial interests are affected by this Site Rehabilitation Completion Order may petition for an administrative proceeding (hearing) in accordance with Section 120.57, Florida Statutes (F.S.). The petition must contain the information set forth below and must be filed (received) in the Office of General Counsel of the Department at 2600 Blair Stone Road, Tallahassee, Florida 32399-2400, within twenty-one (21) days of receipt of this notice. Failure to file a petition within this time period shall constitute a waiver of any right such person may have to request an administrative determination (hearing) under Section 120.57, F.S.

The Petition shall contain the following information:

(a) The name, address and telephone number of each petitioner, the Department file number (DER facility number), and the name and address of the facility;

(b) A statement of how and when each petitioner received notice of the Department's action or proposed action;

(c) A statement of how each petitioner's substantial interests are affected by the Department's action or proposed action;

(d) A statement of the material facts disputed by each petitioner, if any;

(e) A statement of facts which each petitioner contends warrant reversal or modification of the Department's action or proposed action;

(f) A statement of which rules or statutes each petitioner contends require reversal or modification of the Department's action or proposed action; and

(g) A statement of relief sought by each petitioner, stating precisely the action each petitioner wants the Department to take with respect to the Department's action or proposed action.

This Site Rehabilitation Completion Order is final and effective on the date of receipt of this Order unless a petition (or time extension) is filed in accordance with the preceding paragraphs. Upon the timely filing of a petition, this Order will not be effective until further order of the Department.

When the Order is final, any party to the Order has the right to seek judicial review of the Order pursuant to Section 120.68, F.S., by filing of a Notice of Appeal pursuant to Rule 9.110, Florida Rules of Appellate Procedure, with the clerk of the Department in the Office of General Counsel, 2600 Blair Stone Road, Tallahassee, Florida 32399-2400; and by filing a copy of the Notice of Appeal, accompanied by the applicable filing fees, with the appropriate District Court of Appeal. The Notice of Appeal must be filed within 30 days from the date the Final Order is filed with the Clerk of the Department.

The DER Facility Number for this site is 178626031. Please use this identification on all future correspondence with the Department.

Any questions you may have on the technical aspects of this Site Rehabilitation Completion Order should be directed to Gordon Richmond at (904)444-8990. Contact with the above named person does not constitute a petition for administrative determination.

Sincerely,

John M. Ruddell

Site Visit Comments

10/26/2009

Site visit conducted to see South UST closed-in-place (see photos). Mr. Doug Nellums (Leon Ross Inc) onsite and will further cut the tank top before blowing fill dirt into the tank void. This will conclude all UST Closure activities for this site.

10/22/2009

Site visit made to check progress of the UST closures. Leon Ross employees were not onsite - they departed following closing-in-place the North UST (photo taken). EPT drilling crew and Jodi Marsden onsite installing monitoring wells for site assessment photo taken). After discussing project plans with Jodi, I vacated the site.

10/19/2009

During facility Closure, observed free product within excation.
Doug Nellums w/ Leon Ross is closing tanks in place due to area restrictions PCC-050810.

The tanks were emptied of product & pressure washed. Two areas at the drop tube & sump containment could be areas were a leak occurred, however, this was not confirmed. excesively contaminated soils were removed & taken to landfill

10/16/2009

Work continued on 2 SW fiberglass tanks. While uncovering the north tank diesel was encountered about 3 1/2 feet below land surface. Baptist and Enviro Protech are looking at the best was to handle situation.

10/12/2009

Site Visit made to discuss excavation of the two remaining USTs at this site. Doug Nellums (Leon Ross) , Tracy (Spanco) and Baptist Hospital employee onsite - approximate locations of utilities, piping, etc. were discussed as well as the best method to extract the USTs. A small pump house onsite was found to have a pipe leaking and was fixed by Spanco (see photo) - the concrete floor was stained black from the drip. Doug hopes to excavate the first UST on Wednesday, October 14th.

10/08/2009

TXI conducted 10-08-09: Site visit made to check excavation progress. Ken Hicks (Leon Ross) onsite and explained UST was removed yesterday. He stated that the excavation appeared clean and had no petro odor. Ken was nearly complete with fill dirt spreading (see photos).

10/07/2009

TXI conducted 10-7-09: Site visit made at 5:30 pm - UST has already been removed from site (see photos).

Facility ID: 8626031

RE: Return to Compliance
Baptist Hospital
1000 W Moreno Street
Pensacola, FL 32501
DEP Facility # 17/8626031
Escambia County – Storage Tanks

Dear Mr. Keller:

The Florida Department of Health in Escambia County - Environmental Health Division, on behalf of the Florida Department of Environmental Protection, personnel issued a Compliance Assistance Offer letter to the above-referenced facility on February 26, 2021. Based on the information provided, April 7, 2021, the facility was determined to have returned to compliance with the Department's Storage Tank rules and regulations.

The Department appreciates your efforts to maintain this facility in compliance with state and federal rules. Should you have any questions or comments, please to me at 850-595-6700 2036, cell phone 850-554-4333 or Christopher.Bavuso@FLHealth.gov or by mail at the Florida Department of Health in Escambia County - Environmental Health Division, 1300 West Gregory Street, Pensacola FL 32502-3724.

Sincerely,

Christopher Bavuso

Christopher Bavuso conducted a routine compliance inspection on 2/15/2021.
Met onsite with Phillip Cardone for this inspection.

Inspection Comments

02/23/2021
Tank: Double-Wall Steel Alabama Tank containing 1,000 gallons of diesel fuel.

Piping: Copper piping all aboveground.

Release Detection: Krueger Leak Gauge (EQ-675) along with monthly visual inspections.

Overfill Prevention: Krueger Fuel Gauge (EQ-730) along with monthly visual inspections.

The tank exterior appeared to be in good condition with no visible rust or staining. The piping appeared to be in good condition with no signs of corrosion or leaking. The vents, emergency vents, and gauges appeared to be in working condition. The spill containment appeared to be in good condition and was clean and dry. The records that were up to date and available for this inspection were: the placard, monthly visual inspections, and financial responsibility. No current violations for this facility. Signed copy of this inspection report emailed to Chad Keller at Chad.Keller@BHC.PNS.ORG and Phil Cardone at Phillip.cardone@bhcpns.org

Signature was not obtained due to COVID-19 protocol.

Re: Proposed Settlement by Short Form Consent Order in HW Case of Baptist Hospital, OGC File No.: 94-0268

Dear Mr. Stubblefield:

The purpose of this letter is to complete the settlement of the violation(s) previously identified by the Department of Environmental Protection ("DEP") in the Warning Letter dated January 7, 1994, which is enclosed. The corrective actions required to bring your facility into compliance have been performed. However, you must pay to the Department the amount of $4,250 in civil penalties to complete settlement of the violations described in the enclosed Warning Letter, along with $250 to reimburse the DEP's costs, for a total of $4,500. This payment must be made to the "Florida Department of Environmental Protection" by certified check or money order and shall include thereon the OGC number assigned above and the notation "Pollution Recovery Fund". The payment shall be sent to the Department of Environmental Protection, Northwest District Office, 160 Governmental Center, Pensacola, Florida 32501-5794 within 30 days of your signing of this letter.

Your signing of this letter where indicated at the end of page two of this letter constitutes your acceptance of DEP's offer to settle this case on these terms. If you sign this letter, please return it to DEP at the address above. DEP will then countersign the letter and file it with the Clerk of the DEP. When the signed letter is filed with the Clerk, the letter shall constitute a Consent Order, which is final agency action of the DEP, the terms and conditions of which may be enforced in a court of competent jurisdiction pursuant to Sections 120.69 and 403.121, Florida Statutes. Failure to comply with the terms of this letter once signed by you and entered by the DEP Clerk shall constitute a violation of Section 403.161(1)(b), Florida Statutes.

Printed on recycled paper.

Baptist Hospital
OGC File No.: 94-0268

By countersigning this settlement offer, the DEP waives its right to seek judicial imposition of damages, costs and expenses, or civil penalties for the violations described above. By accepting this settlement offer, you waive your right to an administrative hearing to contest this settlement pursuant to Section 120.57, Florida Statutes, and your right to appeal this settlement pursuant to Section 120.69, Florida Statutes. This offer to settle is open until February 28, 1994, or until DEP otherwise withdraws the offer. If you do not sign and return this letter to the Department at the District address given above by this date, the case will be referred to the DEP's Office of General Counsel with a recommendation that formal enforcement action be taken against you. None of your rights or substantial interests are determined by this letter unless you sign it and it is filed with the DEP Clerk.

Sincerely,

Bobby A. Cooley
District Director

I ACCEPT THE TERMS OF THIS SETTLEMENT OFFER.

7. **PERMIT No.**: NA **DATE ISSUED**: **EXP. DATE**:

8. Facility Description:

Baptist Hospital (Baptist) in Pensacola, Florida at the time of this complaint inspection was a conditionally exempt small quantity generator of hazardous waste. This facility, at this location since 1949, was last inspected in 2001. During that inspection, Baptist was in-compliance with RCRA regulations. This complaint inspection was prompted by an anonymous caller on May 12, 2004 indicated that Baptist was improperly disposing of there computer monitors into the solid waste dumpster. I found this compliant to be unfounded.

Baptist generates hazardous waste from the following departments/locations:

1) Maintenance Shop
2) Pharmacy
3) Print Shop
4) Cytology, Histology, and other Laboratories
5) Hazardous Waste Storage Area

Maintenance Shop

Baptist's maintenance shop employs 25 individuals that assist in all repairs and daily maintenance activities for the hospital. Mr. Polk informed me that the maintenance shop contained one 15-gallon parts washer. Mr. Polk also indicated that "Safety Kleen" serviced the facility's parts washer. In the shop area Mr. Polk informed us that all oily rags and oily products are picked up and transported by Aaron Oil.

Pharmacy

When inspecting the pharmacy we found that all outdated pharmaceutical items are picked up and transported back to a redistribution center by the medical provider. EXP (Pharmaceutical Services Corp.) itemizes each item removed from the facility and transports it back to its center. Ken Richmond, the director of the pharmacy, stated that when the medication is back at the center, EXP then determines if it is a waste or not. EXP sends itemized lists to Baptist showing what items were shipped each pickup.

Cytology, Histology, and other Laboratories

The Cytology and Histology Laboratories (housed in one main laboratory) generate waste xylene, alcohol and waste formalin (D001) from cell and tissue preparation procedures. When asked how these wastes are disposed of, Mr. Paul Fontaine stated that waste xylene is placed in small satellite containers. When the container is filled, it is then transferred to a distillation unit to be recycled. Ms. Breckenridge stated that five to ten gallons of waste xylene are generated each week before distillation.

Print Shop

Baptist has a print shop that prints (and develops film to print) documents related to the hospital. The print shop uses three offset printing presses. Blanket-wash is used to clean the presses. Small amounts of blanket-wash are applied to all printing media with squeeze bottles. Once the printing media is cleaned, waste ink and waste blanket-wash are caught on clean-up sheets. The clean-up sheets are then allowed to dry. Once dry, they are disposed of. All printing media is then wiped dry with rags. Dirty rags are also dried and disposed of into the trash bin. I informed Mr. Polk and Mr.

Pfeiffer that the rags should be cleaned by a linen service or shipped as a hazardous waste. They assured us that these rags would be handled appropriately.

Hazardous Waste Storage Area

Baptist stores their hazardous waste within a fenced-in and roofed hazardous waste storage area located outside of the small warehouse. A closer inspection of the storage area revealed the following hazardous wastes and used oil:

1.) One used oil tank, approximately 250 gallons, which was labeled and closed,
2.) One 55-gallon container of used oil filters that was properly labeled and closed.
3.) Two 55-gallon drums of used oil that were labeled and closed.
4.) One box of waste fluorescent bulbs that were being sent for reclamation.

Baptist Hospital remains a Conditionally Exempt Small Quantity Generator.

9. Recommendations:

Baptist representatives should become more knowledgeable with the Code of Federal Regulations, 40 CFR Parts 260 through 268, Part 270 and the Florida Administrative Code 17-730 as applicable to conditionally exempt small quantity generators.

Baptist should ensure that lead, nickel-cadmium, and mercury batteries (rechargeable batteries of these types are also included) from two-way radios, cellular telephones, beepers, calculators, and other devices using these type of batteries be managed as a universal waste and recycled.

Baptist should ensure that rags contaminated with blanket or roller washes (a hazardous waste) are properly disposed of. Baptist should contract a linen service for the laundering of "dirty" rags or laundered in hospital laundry prior to reuse.

All satellite containers within the hospital should be kept closed (except when adding waste to the container) and labeled or marked clearly with the words "hazardous waste" or with other words that identify the specific contents of the container.

Baptist should ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies.

Baptist should ensure that all copies of manifests and land ban notifications are returned from the designated facility and retained for three years.

RE: INDUSTRIAL DISCHARGE PERMIT # 1005-13

Dear Ms. Wilson,

The application for renewal of your industrial discharge permit has been reviewed and processed in accordance with Chapter 26 of the Emerald Coast Utilities Authority Code.

The enclosed **Permit # 1005-13** covers the wastewater discharged from the facility located at **1000 West Moreno Street, Pensacola, Florida** into the ECUA sewer system. All discharges from this facility and reports relating thereto, shall be in accordance with the terms and conditions of this permit.

Please review the Monitoring and Reporting requirements in ADDENDUM I and the specified pollutant limitations shown in ADDENDUM II. Also continue to use the Industrial User Self-Monitoring Report

If you have any questions, please call Jared Tillman at 969-3344 or E-mail at Jared.Tillman@ecua.fl.gov
